Company Workspace

User guide by role

How to use the workspace for your daily work: tasks, clients, projects, chat, files, meetings, leave, attendance, support and finance.

Version 1 · November 2026

Screens in this guide come from a demo company. Names, clients and amounts are examples.

Contents

1. Getting started

Signing in · Finding your way · What each role can do · Using it on your phone

2. Everyday work (everyone)

Your dashboard · Tasks · Messages · Calendar and meetings · Files · Leave · Attendance · Support tickets · Notifications · Your profile and colleagues

3. Department heads

Your team · Adding someone to your team · Giving out and reviewing work · Projects · Workload · Approving leave · Your department's support tickets

4. Client Manager

Leads and clients · Client 360 · Projects for a client · Quotations · Invoices for your clients

5. Finance Head

Finance settings · Invoices · Recording payments · Printing and PDFs · Finance reports

6. Branch Manager

Attendance report · Correcting and importing attendance · Leave and tickets

7. Administrators (Founder and Co-Founder)

Adding employees · Sign-in links · Departments and designations · Roles and permissions · HR settings · Services and industries · Ticket categories · Audit log · Deactivating accounts

8. How work flows from start to finish

Client to cash · A task · Leave · A support ticket

9. Questions and answers

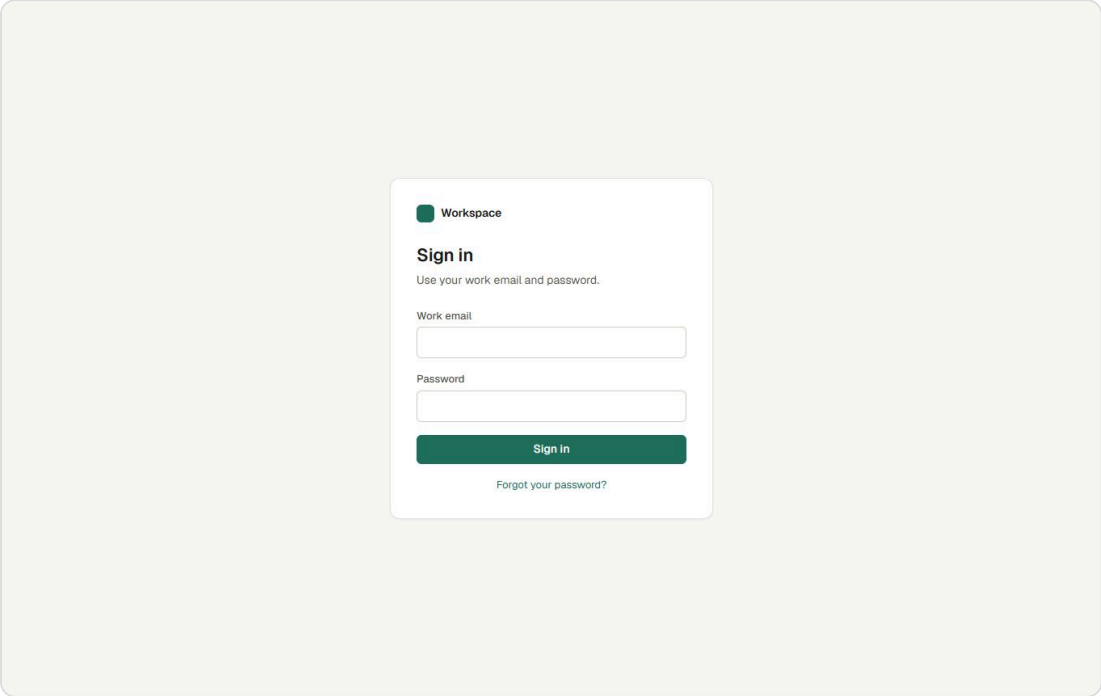

> **Which chapters do I read?** Everyone reads chapters 1 and 2. Then read the chapter for your role. Department heads, the Client Manager, the Finance Head and the Branch Manager also read chapter 3, because they manage a team.

1. Getting started

The workspace is one website for the whole company. What you see depends on your role, so two people can see different menus and dashboards.

Signing in

1. An administrator adds you and sends you an **invitation link** (for example on WhatsApp or in person). The link works once and lasts 7 days.
2. Open the link and choose a password. It must be at least 10 characters, with letters and numbers.
3. You are signed in and taken to your **Overview**.
4. Next time, go to the workspace address and sign in with your work email and password.

The sign-in page

> **Forgot your password?** Email is not connected yet, so ask an administrator for a **password reset link**. It works once and lasts 1 hour. After 10 wrong passwords in 15 minutes, sign-in pauses for a while.

Finding your way

- **Sidebar (left):** every page you can use. Pages you do not have access to are simply not there.
- **Bell (top right):** your notifications. A red number shows how many are unread.
- **Sun and moon icon:** switches between light and dark colours.
- **Your initials:** **My profile** and **Sign out**.
- If you open a page you cannot use, you see **Page not found**. That is normal.

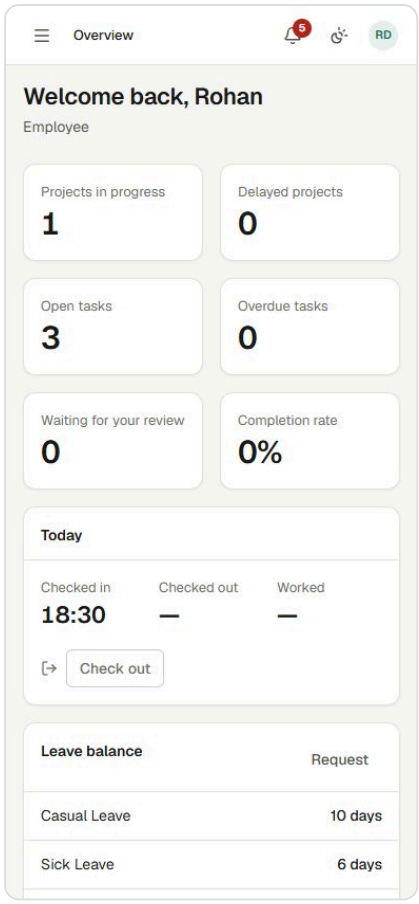

What each role can do

Area	Employee	Department heads*	Client Manager	Finance Head	Branch Manager	Founder, Co-Founder
Tasks, projects, messages, files, calendar, leave, attendance, support	✓	✓	✓	✓	✓	✓
Employees page	Manager and colleagues	Their team	Their team	Their team	Their team	Everyone
Add people	–	To their team	To their team	To their team	To their team	Anyone
Give work to others, workload, approve leave	–	✓	✓	✓	✓	✓
Clients and Client 360	–	–	✓	–	–	✓
Quotations and invoices	–	–	Own clients	All	–	All
Record payments, finance reports	–	–	–	✓	–	✓
Correct or import attendance	–	–	–	–	Department	✓
Org chart, roles, settings, audit log	–	–	–	Finance settings	–	✓

* Department heads: Design & Development Head and Digital Marketing Head. Roles are set by the Founder, who can change them in Settings, Roles.

Using it on your phone

The workspace works in your phone's browser. Tap the three lines at the top left to open the menu.

The Overview on a phone

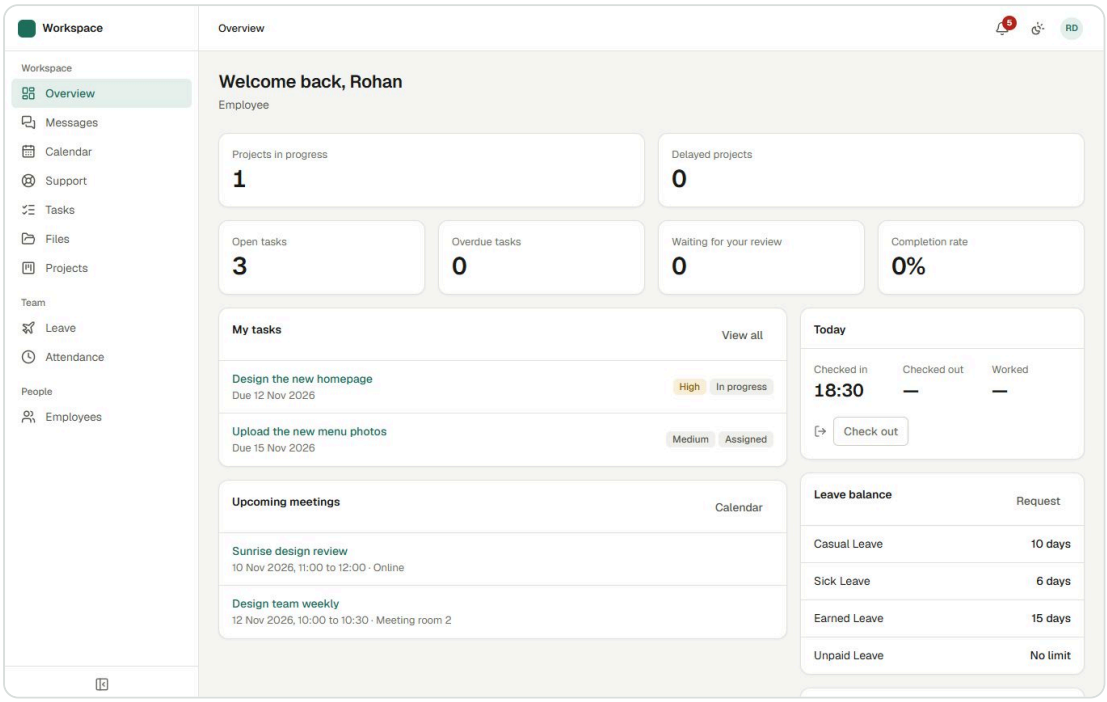

> **Tip:** add the site to your home screen (in the browser menu, choose **Add to Home screen**). It then opens like an app, and on an iPhone this is needed for phone alerts.

2. Everyday work

Everything in this chapter is the same for every role.

Your dashboard

Overview is your home page. It shows your open tasks, today's attendance, upcoming meetings, your leave balance and your profile. Managers see more, such as leave to approve and their team's workload. Click any figure or item to open it.

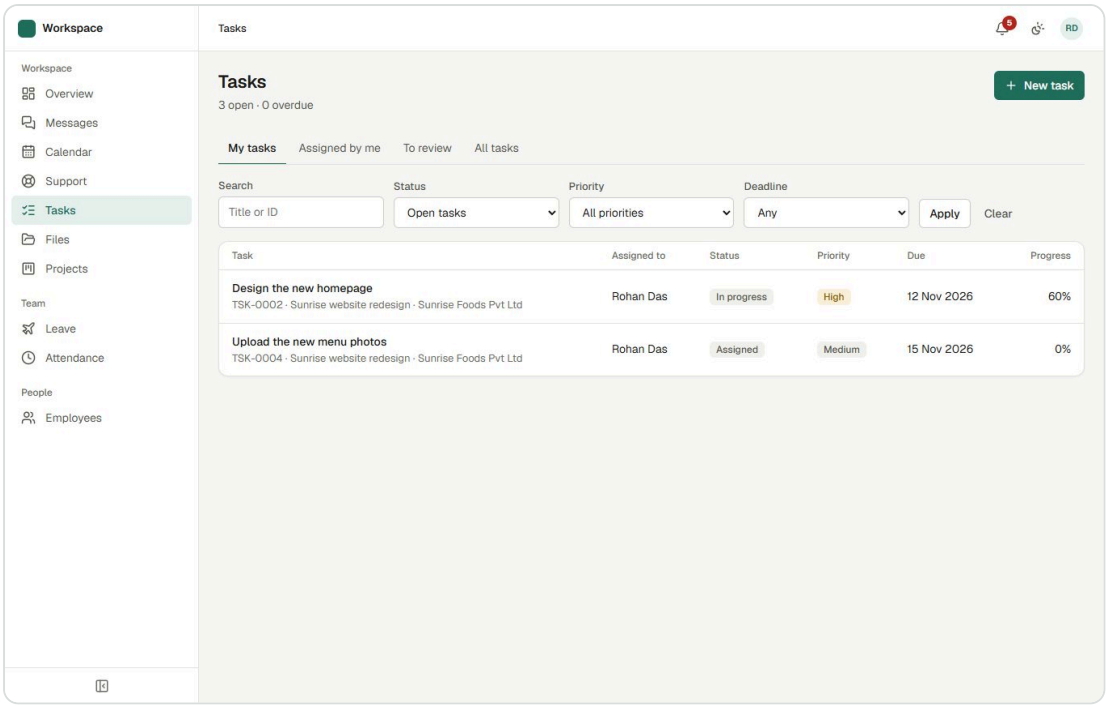

An employee's Overview

My workload

The **My workload** card shows how full your week is, against a 40-hour week: **Has capacity**, **Balanced** or **Overloaded**. It also shows the hours of work left, your open and overdue tasks, and how often you finished on time in the last 90 days. Urgent and overdue work counts for more. If you are overloaded, talk to your manager about what can wait.

Tasks

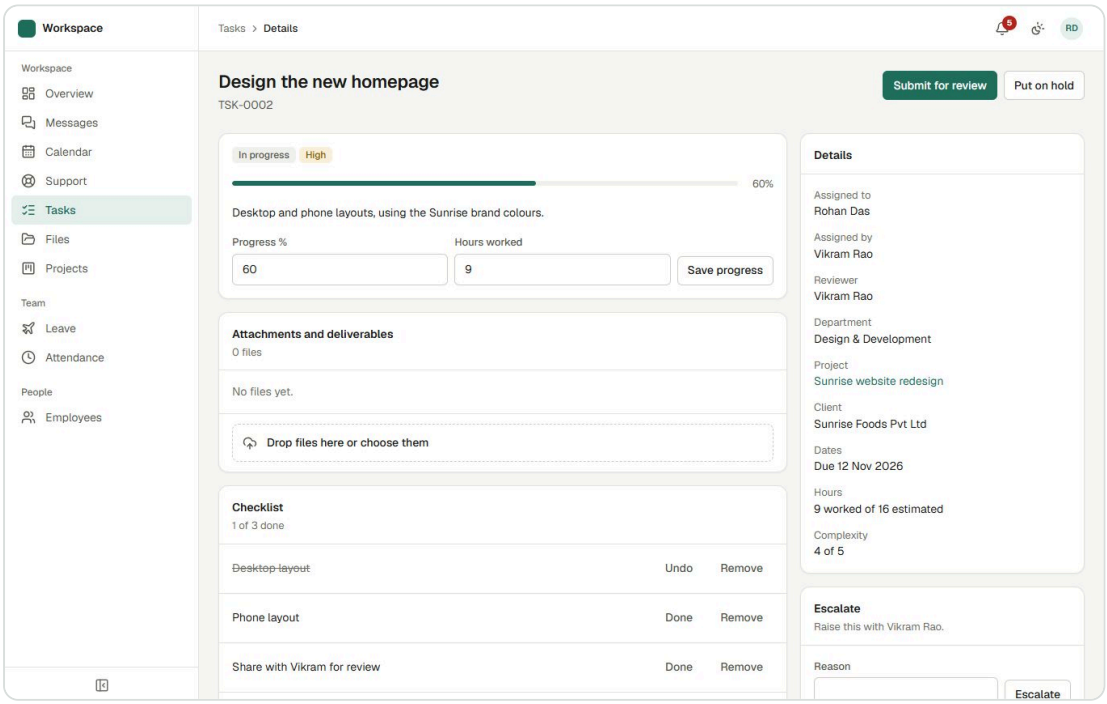

Tasks lists the work given to you. Open a task to see its details, checklist, files, comments and history.

Your tasks

Working on a task

1. When a task is assigned to you, you get a notification. Open it and click **Accept**, or **Reject** if you cannot take it on.
2. When you begin, click **Start work**. Update **progress** and **hours** as you go, and tick off the checklist.
3. Use **comments** to ask questions. The person who gave you the task is notified.
4. When it is done, click **Submit for review**. Your reviewer either clicks **Approve** or **Request changes**.
5. If changes are requested, read the comment, fix it, and submit again.

A task with its progress, checklist and comments

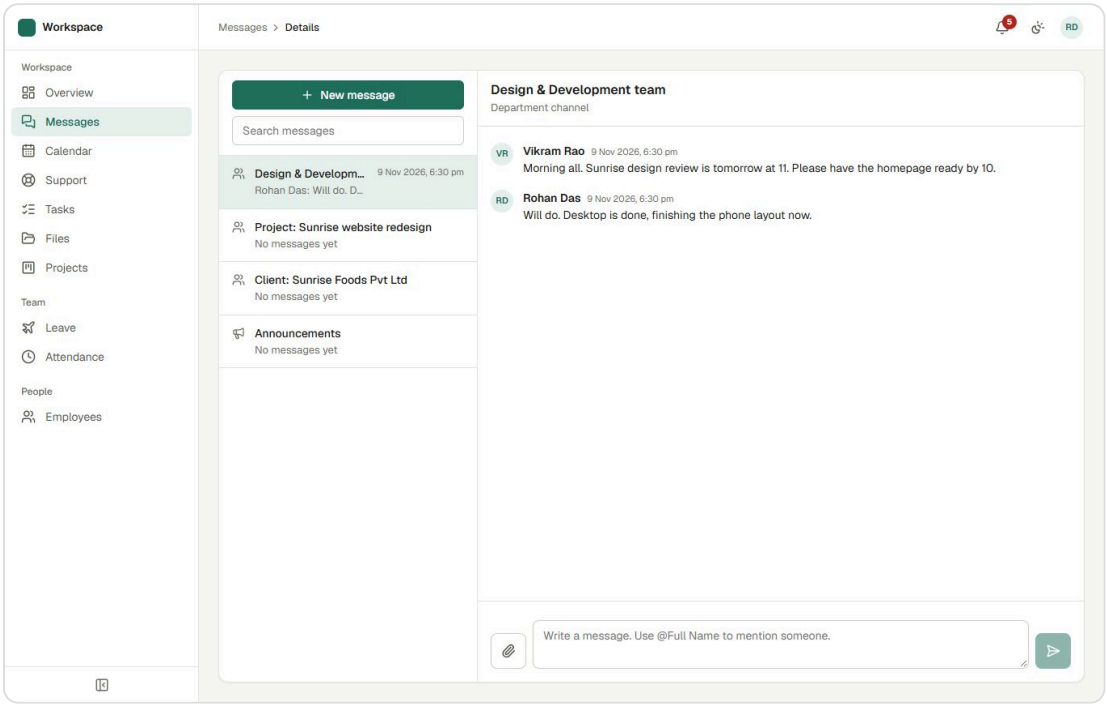

- **Your own tasks:** click **New task** to add work for yourself. You can mark these complete without a review.

- **Deadlines:** you are reminded when a task is due today or tomorrow, and when it is overdue. Work that is two days overdue is passed to your manager.
- A task cannot start while a task it depends on is unfinished.

Messages

Messages is the company chat. You are automatically in your department's channel, the channels of projects you work on, and Announcements.

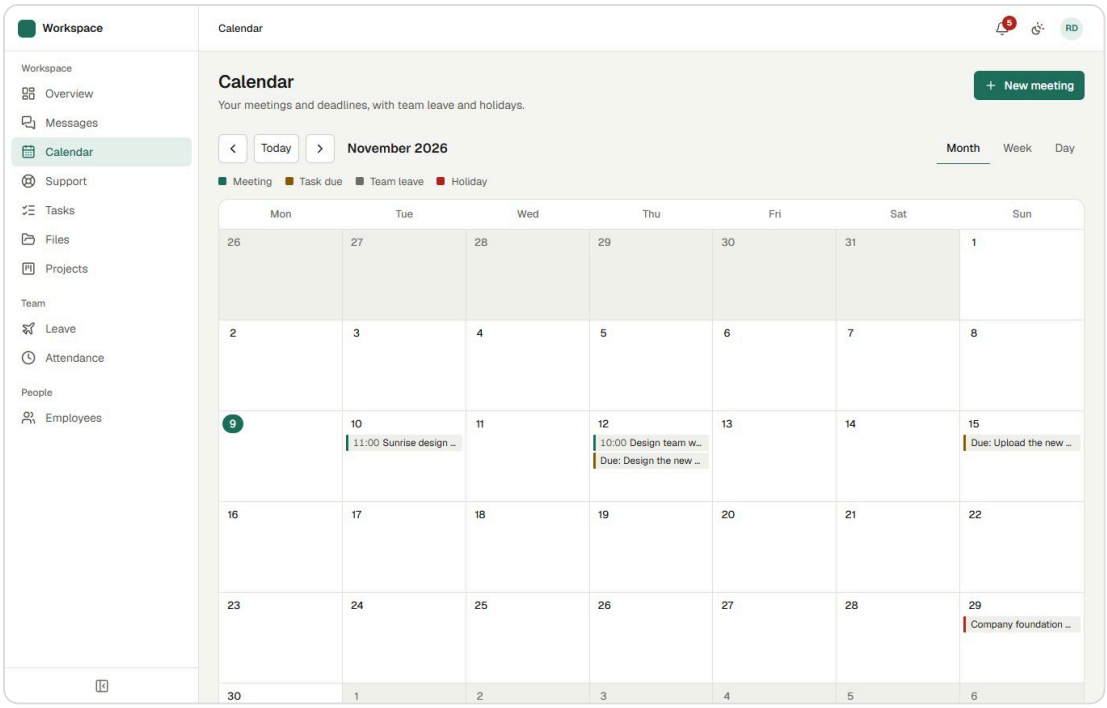

- Click New message to message one person, or create a group.
- Type @ and a full name to mention someone. They are notified.
- Click the paperclip to attach a file. Each message has buttons to reply to it, and to edit or delete your own.
- Only administrators can post in Announcements.

The department channel

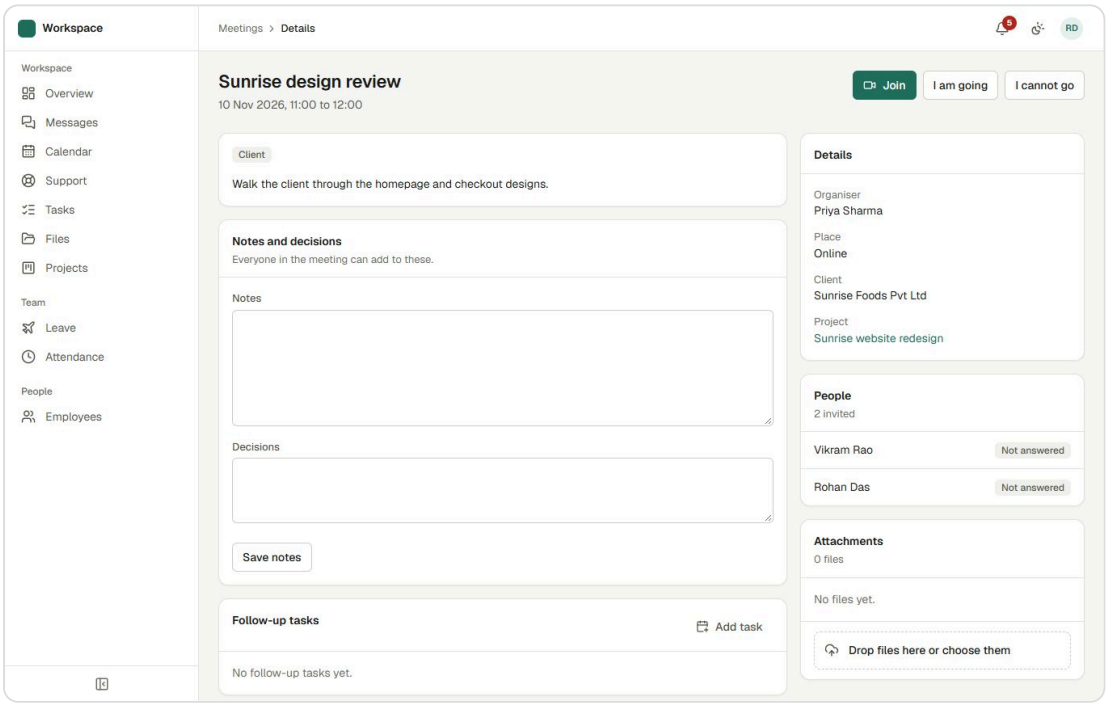

Calendar and meetings

Calendar shows your meetings, the tasks due, approved team leave and company holidays.

The calendar

1. To schedule a meeting, click **New meeting**, choose the date and time, add a place or a meeting link, and choose the people. Everyone invited is notified.
2. When invited, open the meeting and click **I am going** or **I cannot go**.
3. Everyone is reminded 15 minutes before it starts.
4. During or after the meeting, anyone in it can write **notes** and **decisions**, and add **follow-up tasks**. The organiser clicks **Mark as held** afterwards, or **Cancel meeting**.

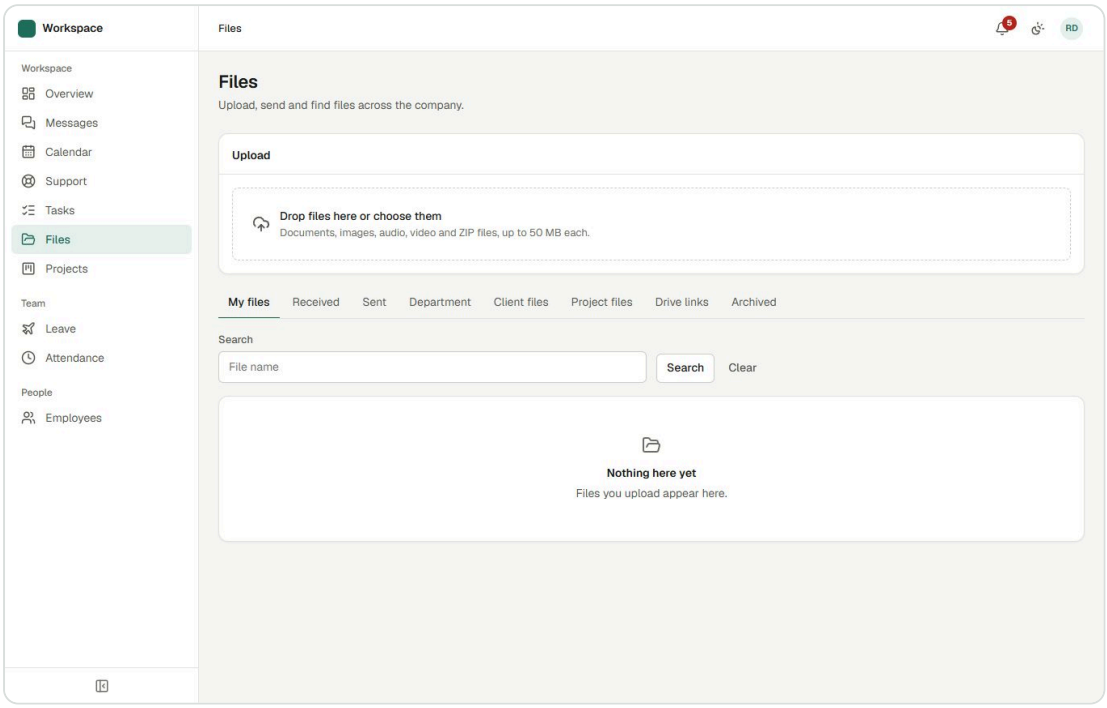

A meeting, with the buttons to answer the invitation

Files

Files holds your files and the files sent to you.

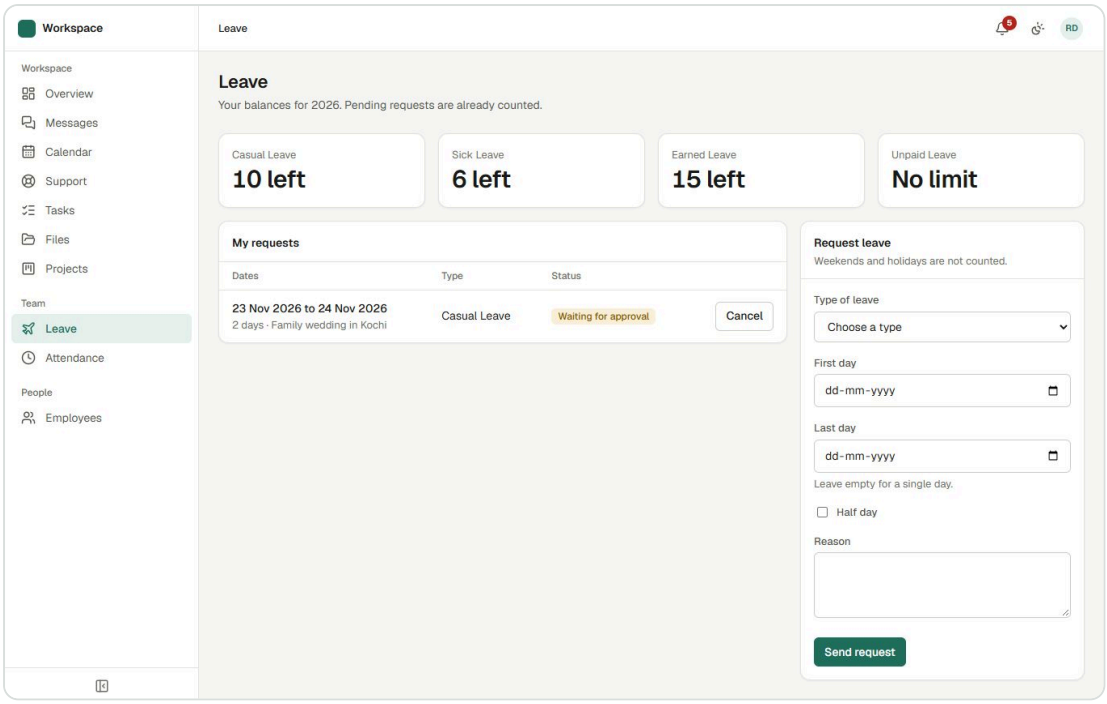

- **Upload:** drag files onto the box, or click **Drop files here or choose them**. The limit is 50 MB per file. Programs are refused for safety.
- **Send:** open a file and send it to people or a whole department, with a note and an optional end date.
- **New version:** upload a new version of the same file. Older versions are kept.
- Each file shows who viewed and downloaded it. Files can also be attached to tasks, projects, meetings and tickets.

Files

Leave

1. Open Leave. Your balance for each type of leave is at the top.
2. Choose the **type of leave**, the **first day** and **last day**, and a **reason**. Tick half day if needed, and attach a document if asked.
3. Click Send request. Your manager is notified and approves or rejects it. You are told either way.

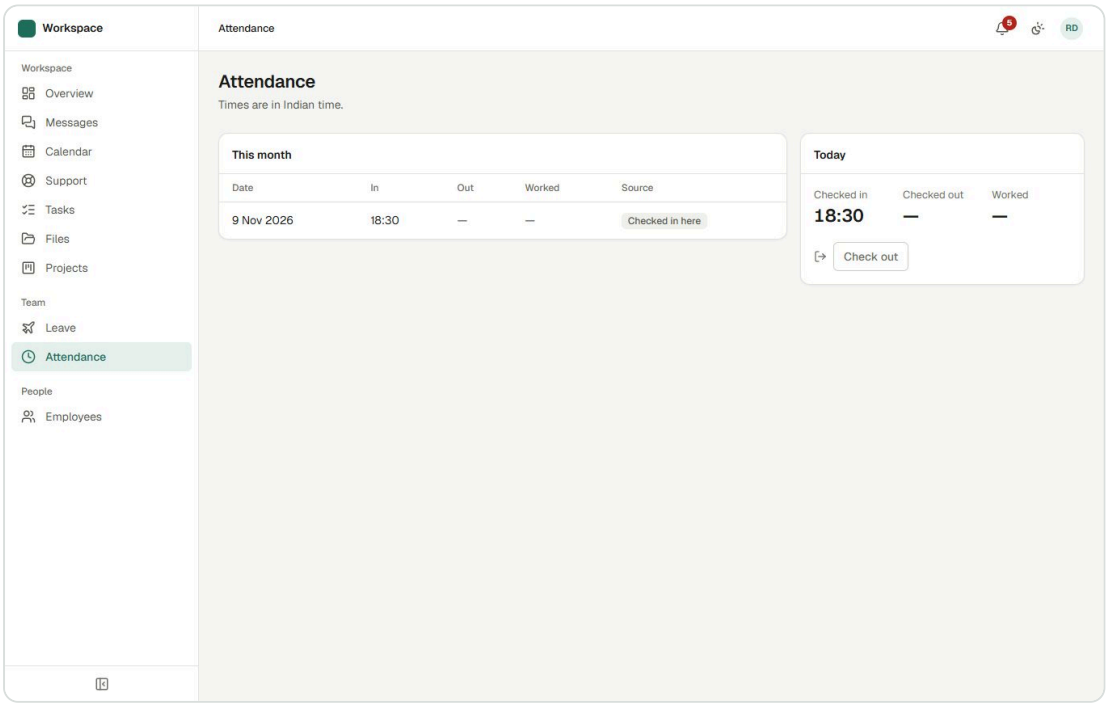

Requesting leave, with your balance

- Only working days count. Weekends and holidays inside your leave are free.
- A request that overlaps other leave, or goes over your balance, is refused. Unpaid leave has no limit.
- You can cancel a request while it is waiting, or after approval if the leave has not started yet.

Attendance

Click **Check in** when you start work and **Check out** when you finish, either on your Overview or on the **Attendance** page. The server's clock is used, not your phone's.

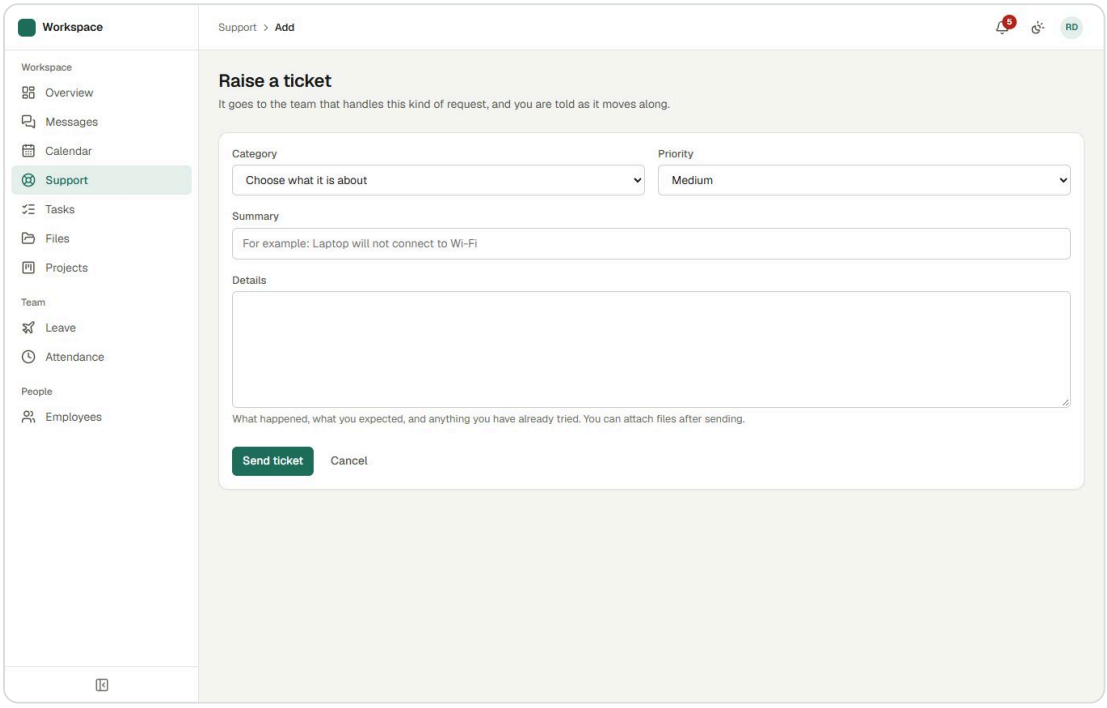

Your attendance

> Arriving after the start time plus the grace period counts as **late** (at first: 9:30 plus 15 minutes). If you forgot to check in, ask your Branch Manager or an administrator to correct it.

Support tickets

Use **Support** when you need help from IT, HR, finance or the office.

1. Click **Raise a ticket**, choose a **category**, write a short summary and the details, and click **Send ticket**.
2. The category decides which team handles it. You can follow it under **My tickets**, and you are told when it changes.
3. If the support team asks for more information, reply on the ticket.
4. When it is resolved, click **It is fixed** to close it, or **Still a problem** to reopen it.

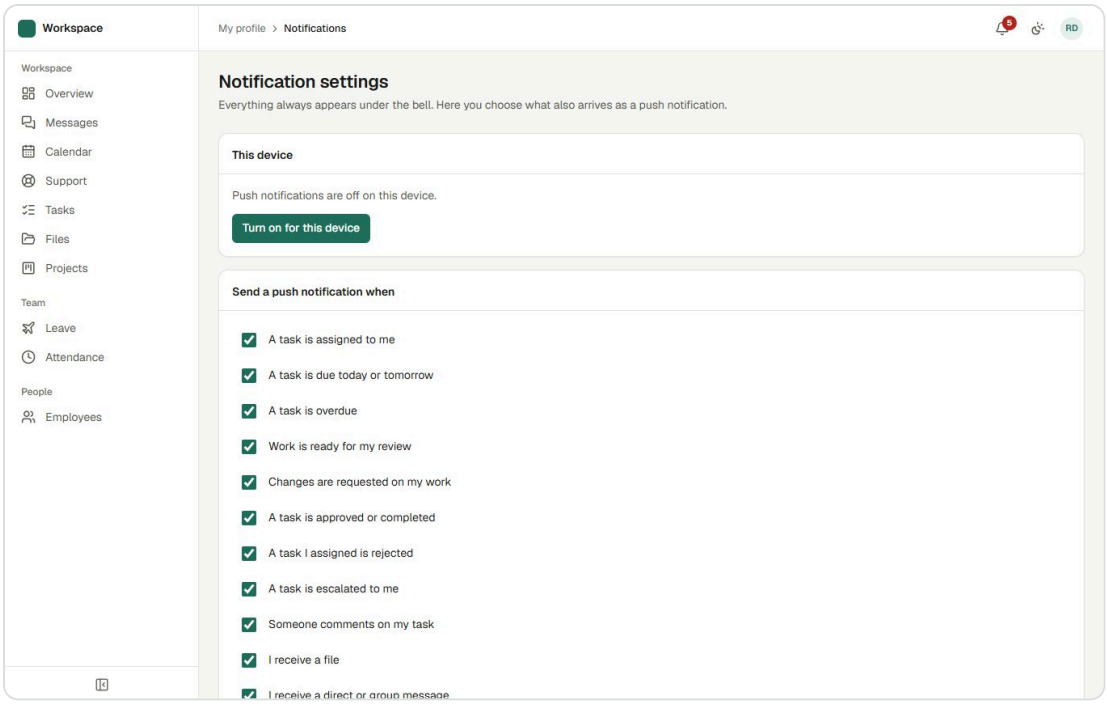

Raising a ticket

Notifications and phone alerts

The bell shows everything that needs your attention. To get alerts on your phone or computer even when the workspace is closed:

1. Click your initials, then **My profile**, then **Notification settings**. You can also click the bell, then **Settings**.
2. Click **Turn on for this device** and allow notifications when your browser asks.
3. Choose which kinds of alert you want. Do this on each phone and computer you use.

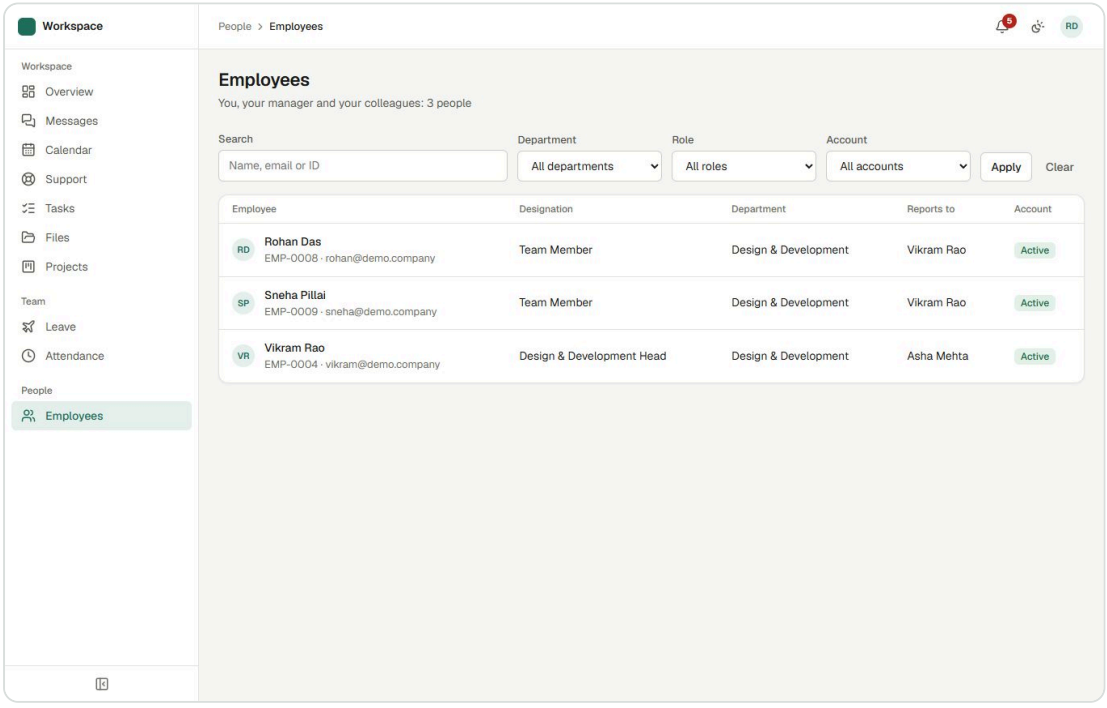

Choosing your alerts

> **iPhone:** first add the site to your home screen, open it from there, then turn alerts on.

Your profile and colleagues

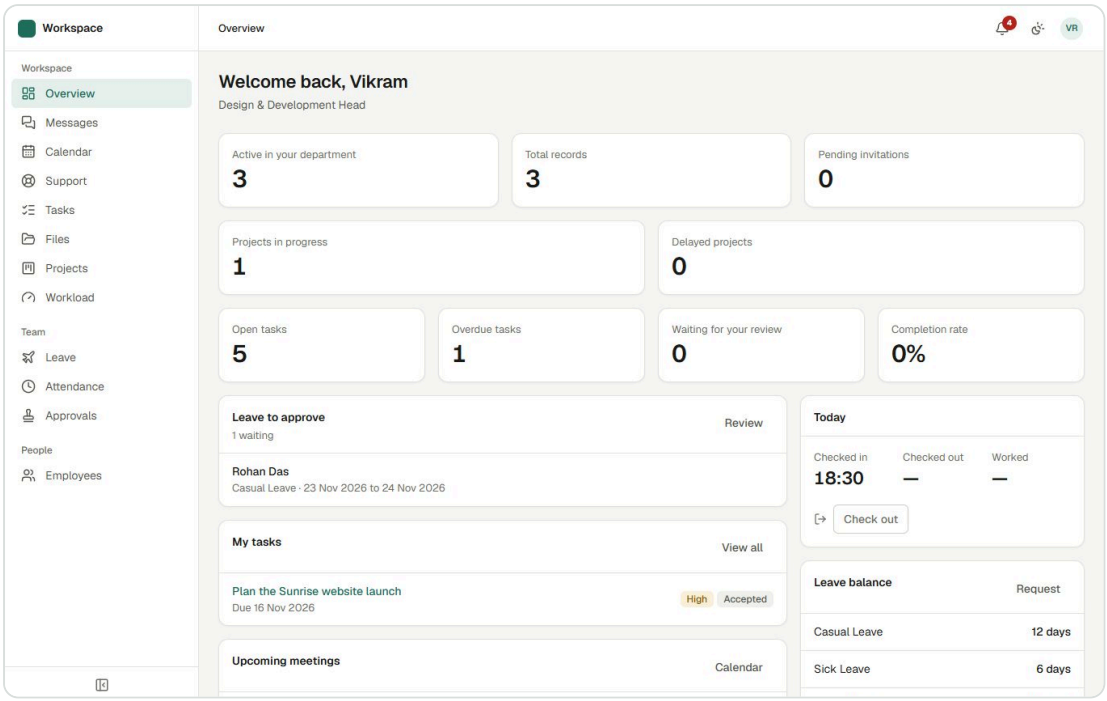

- **My profile** (click your initials): update your phone number and skills. Other details are changed by your manager or an administrator.
- **Employees**: an employee sees their manager and the colleagues who share that manager. Managers see their whole team. Everyone's name still appears wherever you choose people, such as tasks, chats and meetings.

An employee's Employees page: their manager and colleagues

3. Department heads

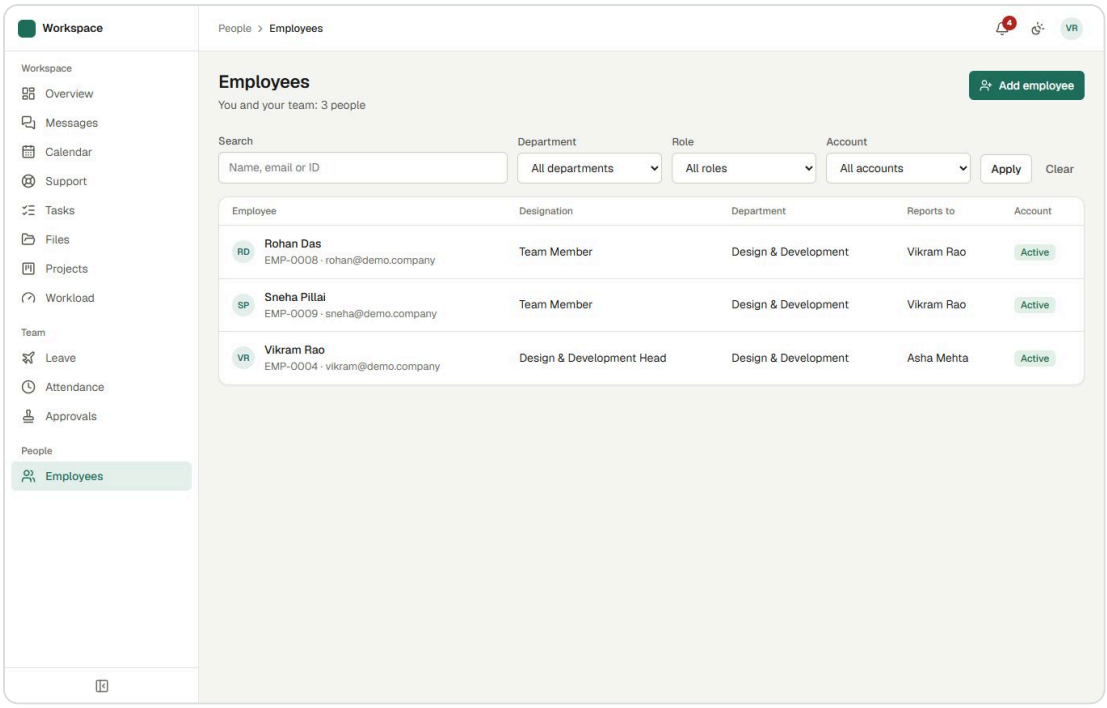

For the Design & Development Head and the Digital Marketing Head. The Client Manager, Finance Head and Branch Manager also manage a team, so the parts about your team apply to them too.

A department head's Overview: leave to approve, tickets, workload and team

Your team

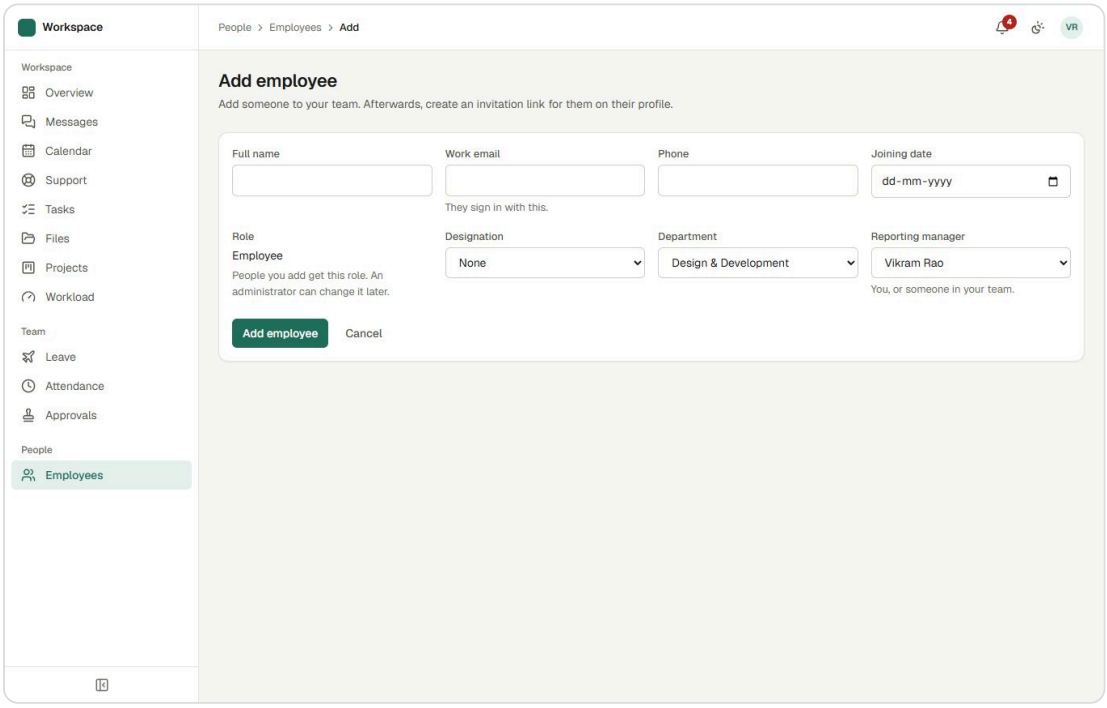

Employees shows you and everyone who reports to you, at any level. You can open their profiles and edit their details, such as designation, reporting manager and employment status. You cannot change roles or move people to another department; ask an administrator.

A head's team

Adding someone to your team

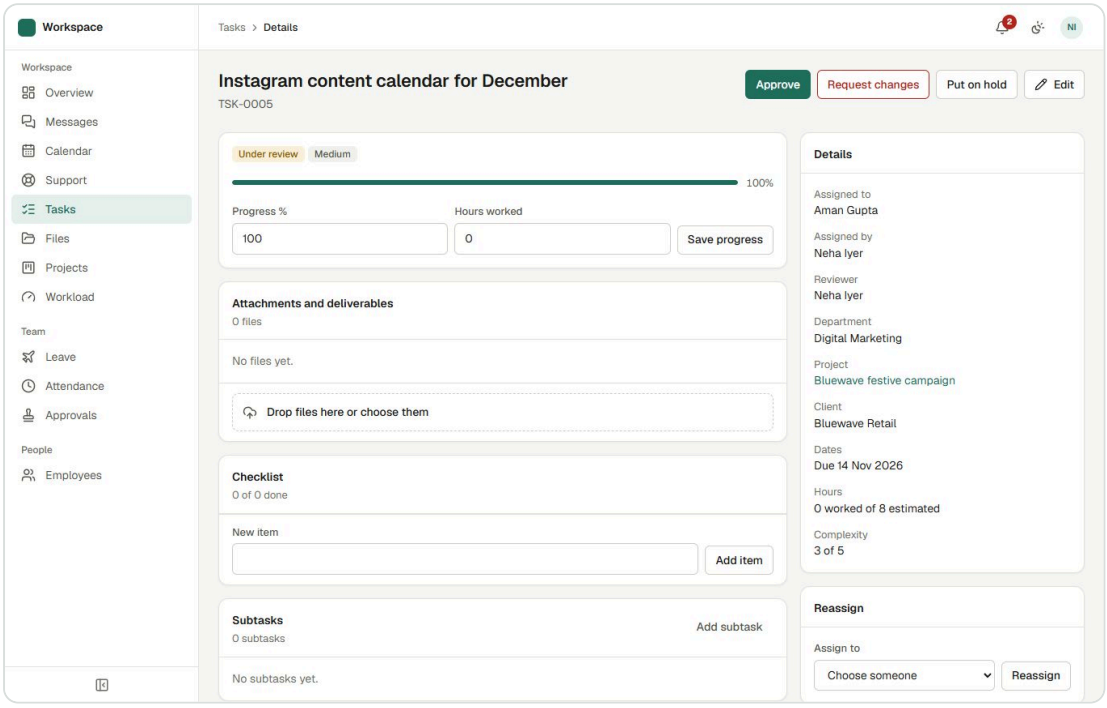

1. In **Employees**, click **Add employee**.
2. Enter their full name and work email. Choose a designation, and who they report to: you or someone in your team.
3. Click **Add employee**. They join your department with the **Employee** role.
4. On their profile, click **Invitation link**, then **Create link** and **Copy link**. Send it to them so they can set their password.

Adding someone to your team. The role is set for you.

Giving out and reviewing work

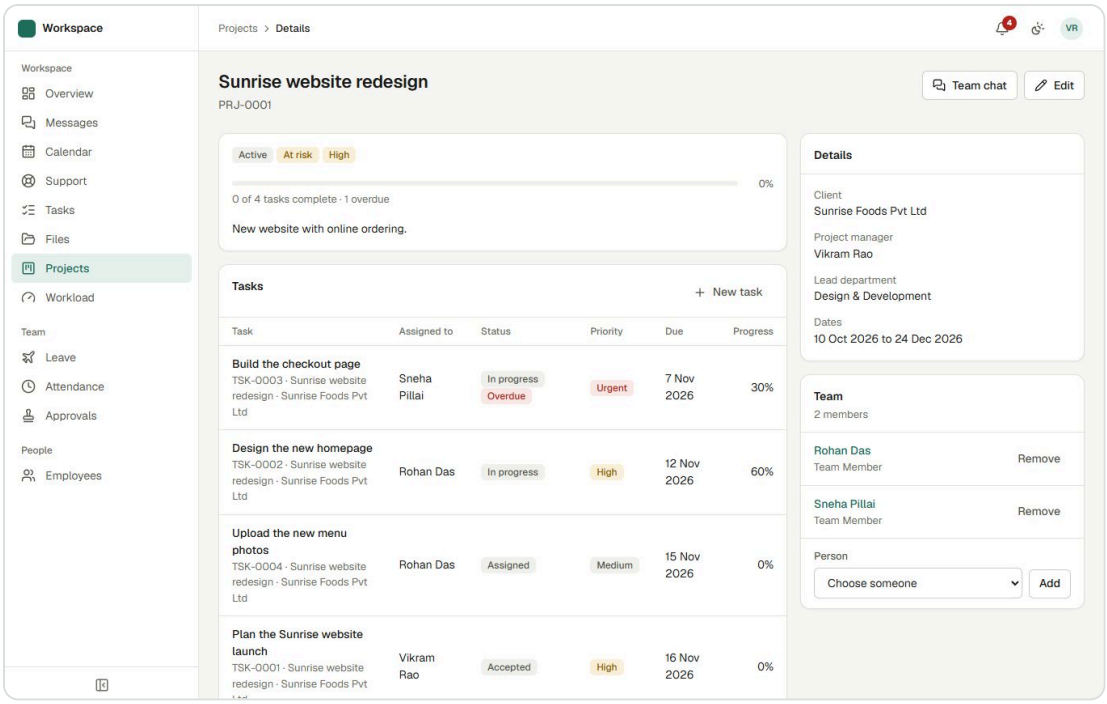

1. Click **New task** (in Tasks, or inside a project).
2. Give it a title and details, choose who does it, the priority, due date and estimated hours. You can name a reviewer and add reference links. Checklist items are added on the task page.
3. You can give tasks to your team, and to the head of another department. To reach someone in another team, give it to their head.
4. When the person clicks **Submit for review**, you are notified. Open the task and click **Approve**, choosing the **quality of the work**, or **Request changes** with a comment.
5. Big tasks can be broken into **subtasks**. A task cannot be completed while a subtask is open.

A task waiting for review

Projects

A project groups the work for one goal, often for a client. On a project page you manage the team, milestones, tasks and files, and see progress. Projects you manage or work on are listed under **Projects**.

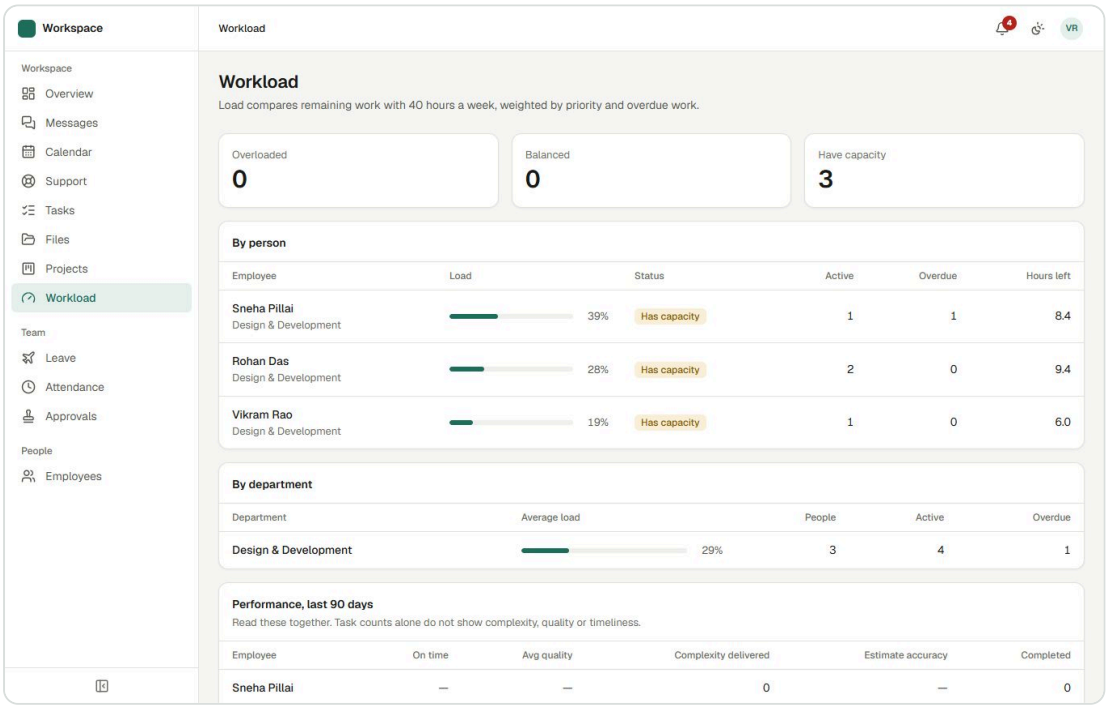

A project with its progress, milestones, team and tasks

> Only the Client Manager and administrators link projects to clients. You still see the client's name on the projects and tasks you work on.

Workload

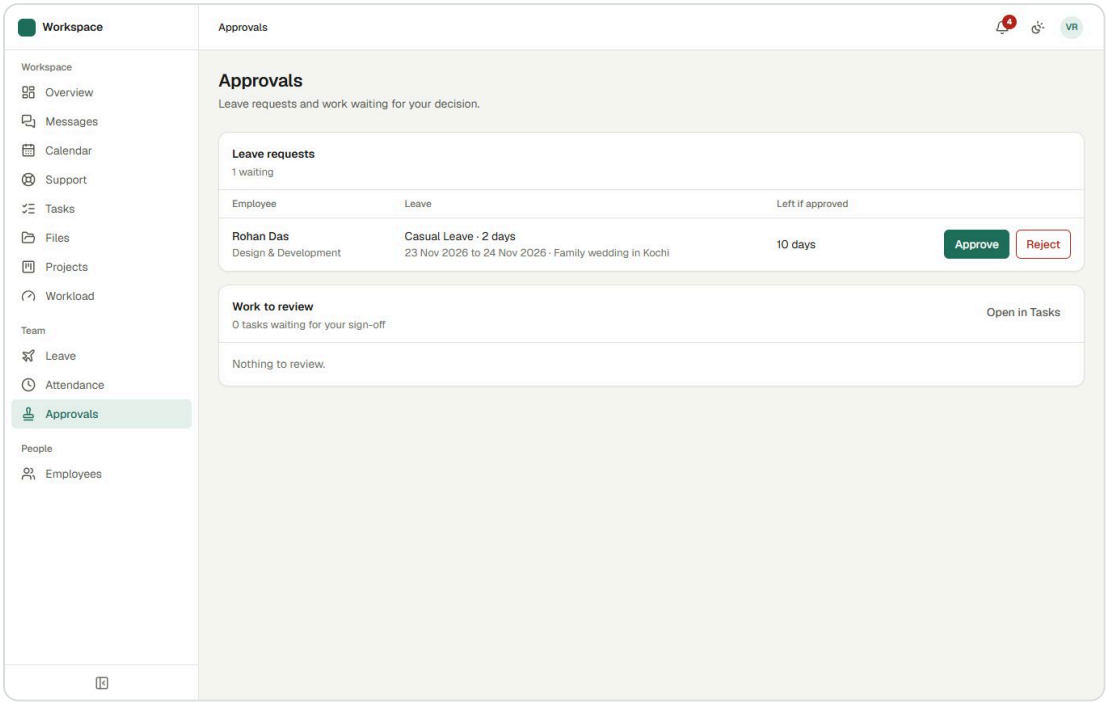

Workload shows how busy each person in your team is, compared with a 40-hour week. Above 100% is overloaded; below 40% has room for more. It also shows on-time rate, quality and estimate accuracy, so you can plan fairly.

Your team's workload

Approving leave

Leave requests from your team appear on your Overview and in **Approvals**. Click **Approve**, or **Reject** with a reason. The person is told straight away, and approved leave appears on the team calendar.

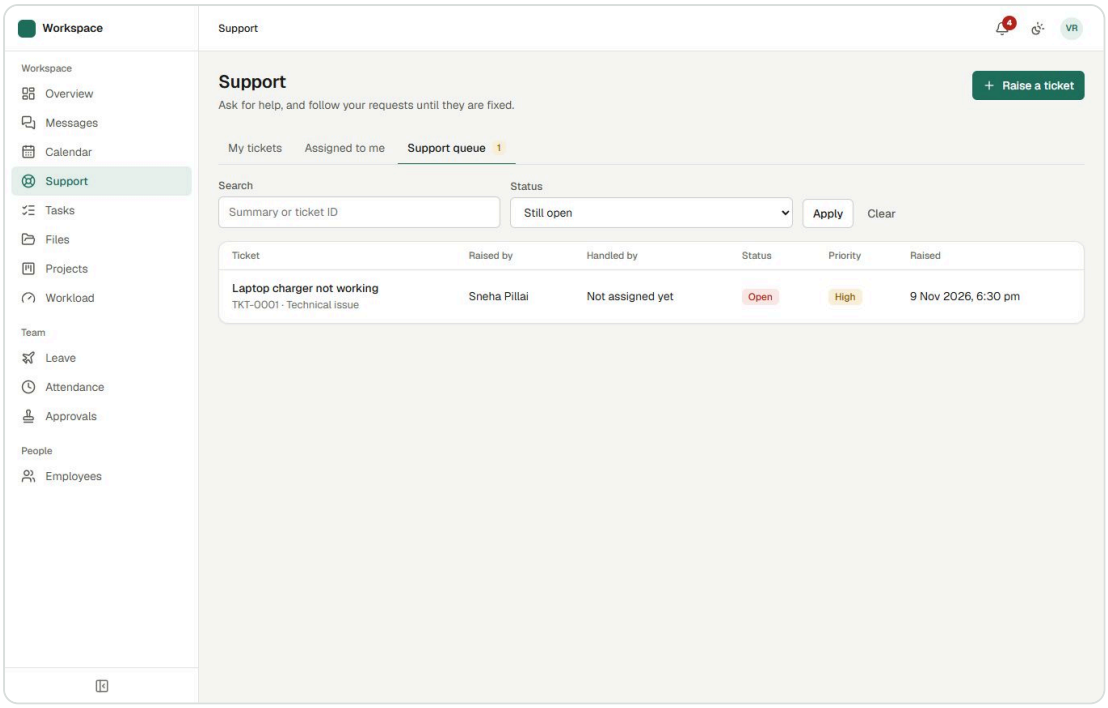

Leave waiting for approval

Your department's support tickets

Tickets in your department's categories appear in **Support**, under **Support queue** and **Assigned to me**.

1. Open a ticket and choose who handles it, or handle it yourself.
2. Click **Start work**. If you need more details, click **Ask for more information**.
3. When it is done, click **Resolve** and describe what was done. The person who raised it confirms or reopens it.

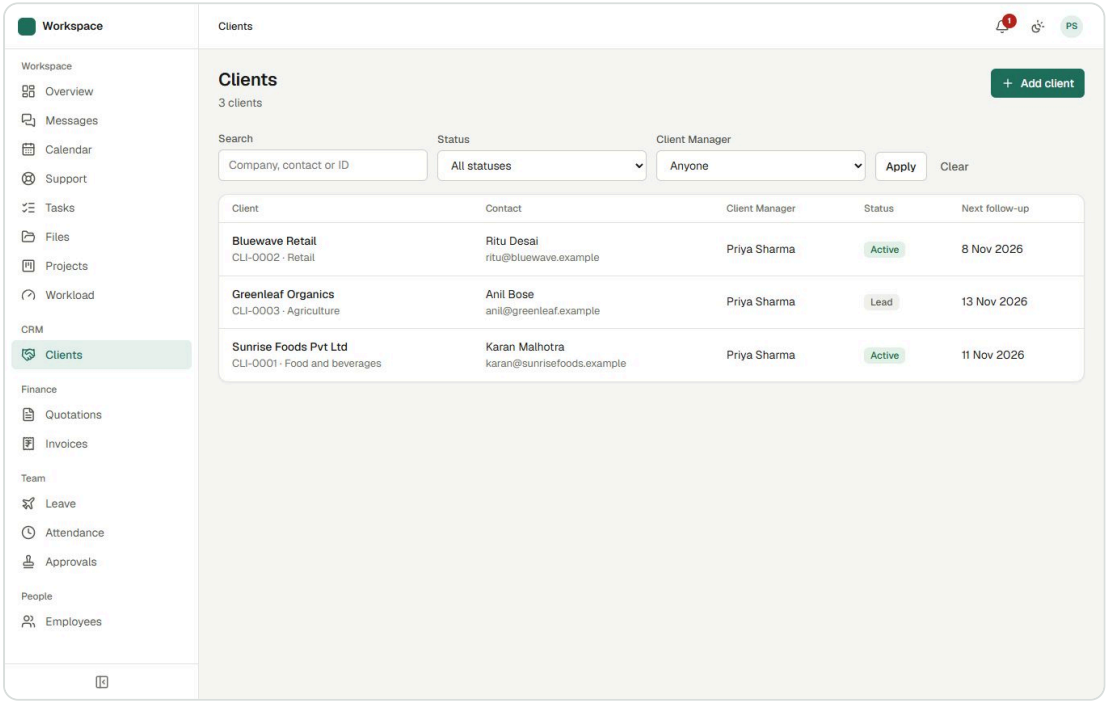

The support queue

4. Client Manager

You look after clients from the first contact until they pay. Read chapter 3 too, for managing your team and giving out work.

Leads and clients

1. Open **Clients** and click **Add client**. Status **Lead** is for prospects.
2. Enter the company, contact details and website. For **Industry**, type a few letters (for example *real*) and choose from the list. Industry is optional.
3. **Step 1, Services:** type a few letters (for example *web* or *marketing*) and press Enter or click to choose. Choose every service the client needs; each shows as a tag with an × to remove it.
4. **Step 2, Sub services:** only the sub services of the services you chose appear here, under their headings. Type to find them (for example *seo* or *website*). Choose at least one for each service; the form tells you which service still needs one. Removing a service also removes its sub services.
5. Add the **GSTIN** and **billing state**; they are needed for correct GST on invoices.
6. Set the **next follow-up** date. Follow-ups that are due appear on your Overview.
7. When a lead signs up, change the status to **Onboarding** or **Active**.

The client list

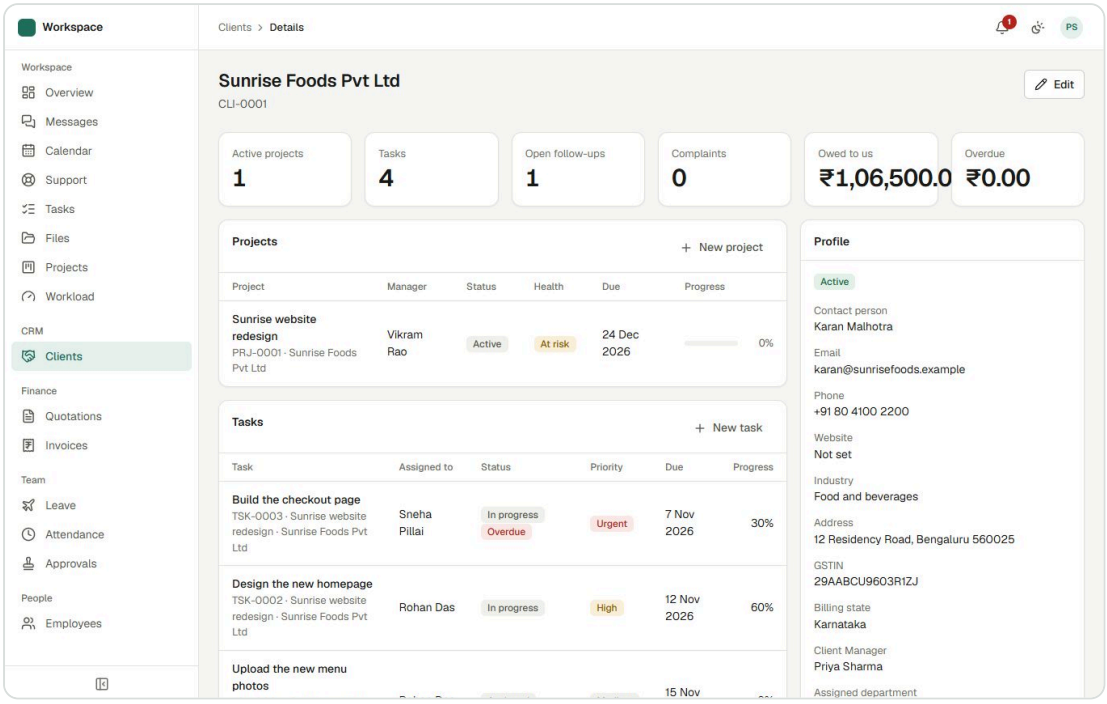

Client 360

Open a client to see everything about them on one page:

- Projects, tasks, invoices, quotations and meetings for the client, with what they still owe.
- **Requirements, feedback, complaints, notes and follow-ups**. Add them as they happen, and mark follow-ups done.

- The **services** they take, shown as service › sub service (for example Web & AI › Website Design), with their status. Add more by typing in the Services panel; a client always keeps at least one.
- Their files, and a **timeline** of everything that has happened.

On the client list, use the **Industry**, **Service** and **Sub service** filters to find, for example, every Real Estate client, everyone taking Web & AI, or everyone taking SEO.

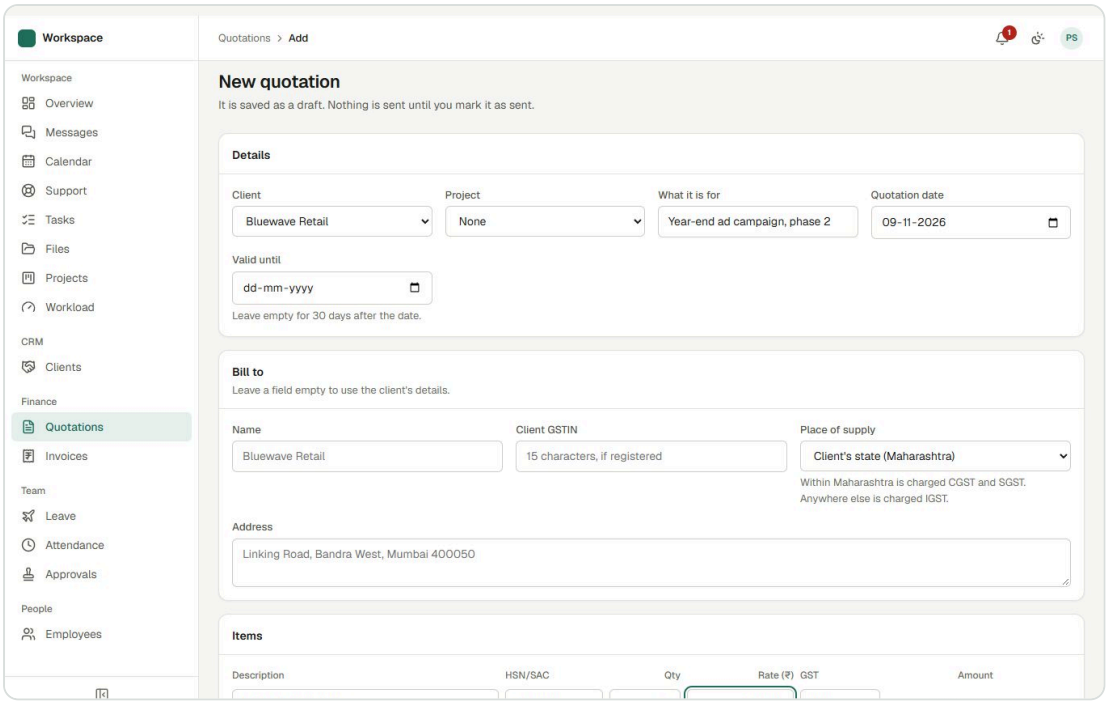

Client 360

Projects for a client

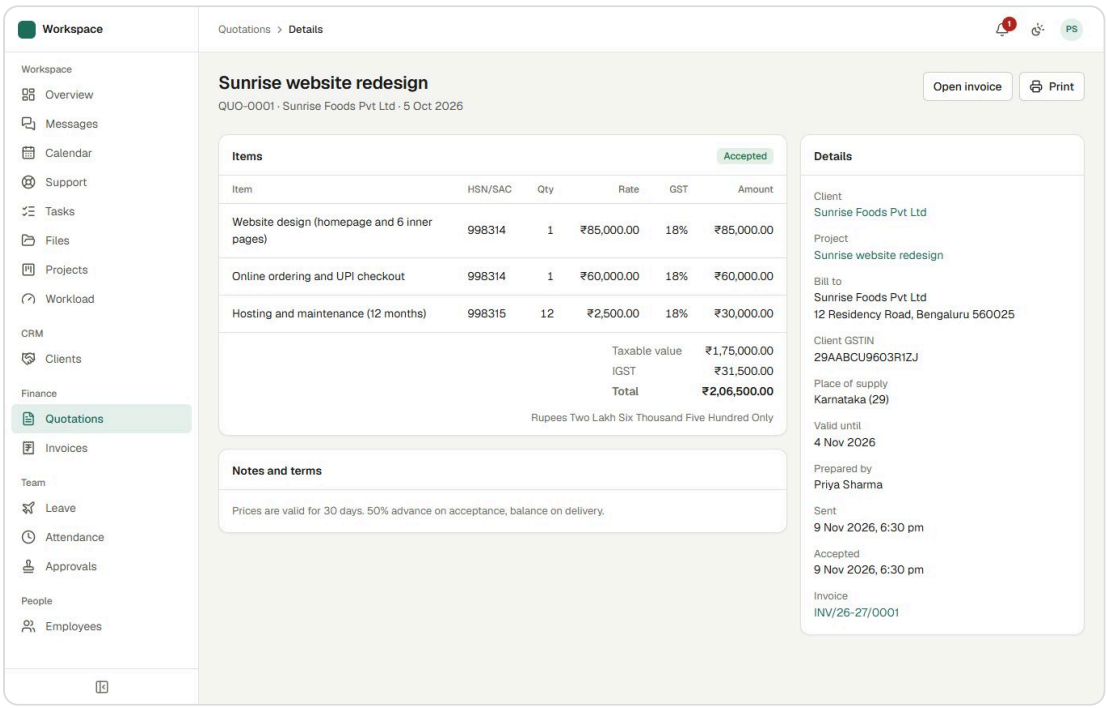

On the client's page, click **New project**. Choose the department that will do the work and a project manager (usually the department head). Then give the work to department heads with **New task**; they share it out in their teams. Each client and project has its own chat channel.

Quotations

1. On the client's page, click **New quotation** (or use Quotations in the sidebar).
2. Say what it is for. Add the items: description, HSN or SAC code, quantity, rate and GST rate. The total and GST are worked out as you type.
3. Click **Save quotation as draft**, then **Print** to save it as a PDF and send it to the client.
4. Click **Mark as sent**. When the client answers, click **Client accepted** or **Client declined**.
5. For an accepted quotation, click **Create invoice**. A draft invoice is made with the same items.

Writing a quotation. Totals and GST update as you type.

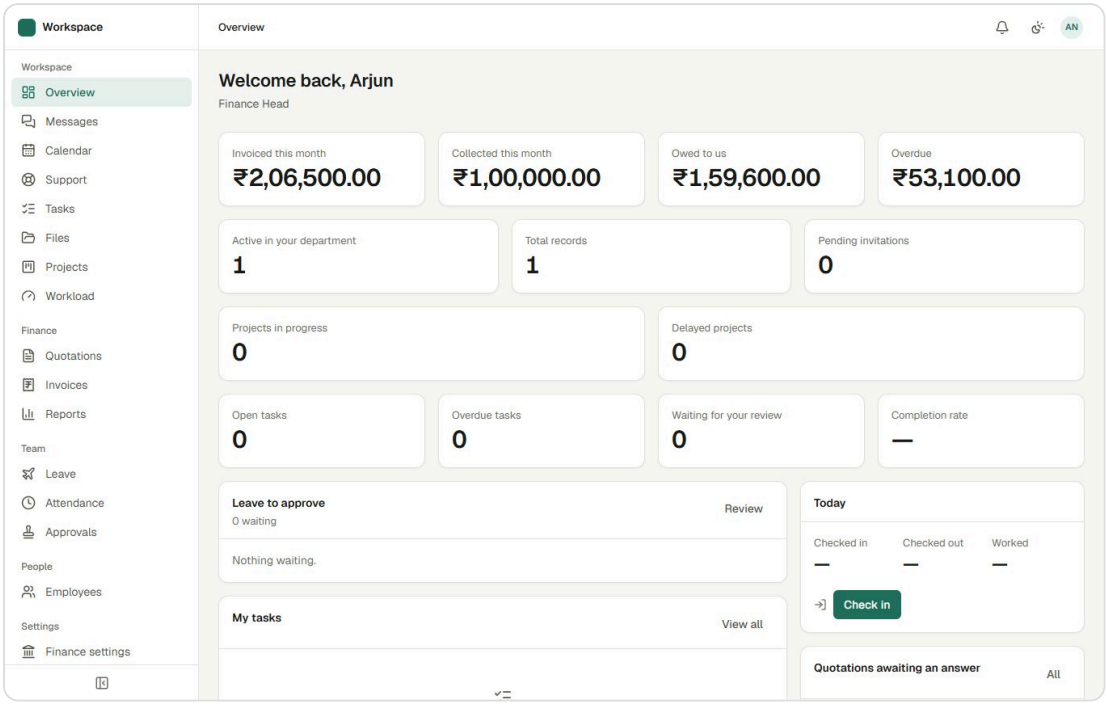

An accepted quotation, already turned into an invoice

Invoices for your clients

You can draft and issue invoices for the clients you manage. The steps are in chapter 5, under **Invoices**. You are notified when your clients pay, and when one of their invoices becomes overdue. Only the Finance Head records payments.

5. Finance Head

You manage quotations, invoices, payments and the finance reports for every client. You do not have the Clients section, but you see each client's name and billing details inside Quotations and Invoices.

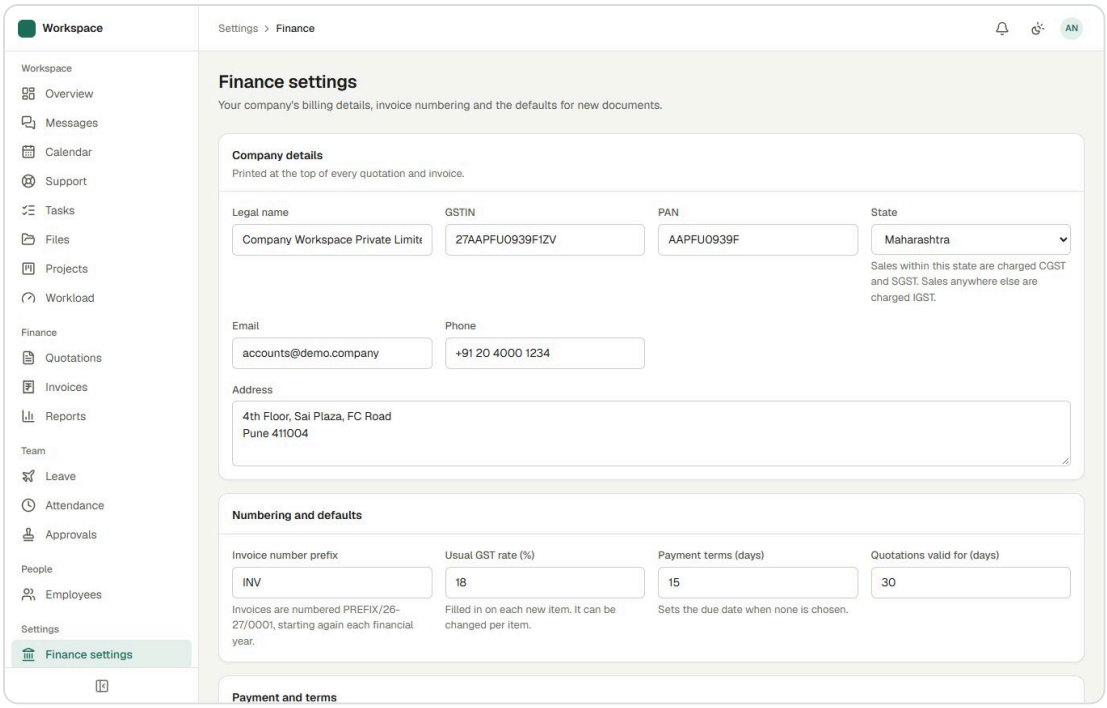

The Finance Head's Overview with this month's revenue

Finance settings (do this first)

Open Finance settings and fill in the company's **legal name, GSTIN, PAN, state, address** and **bank details**, and the default terms. They are printed on every quotation and invoice.

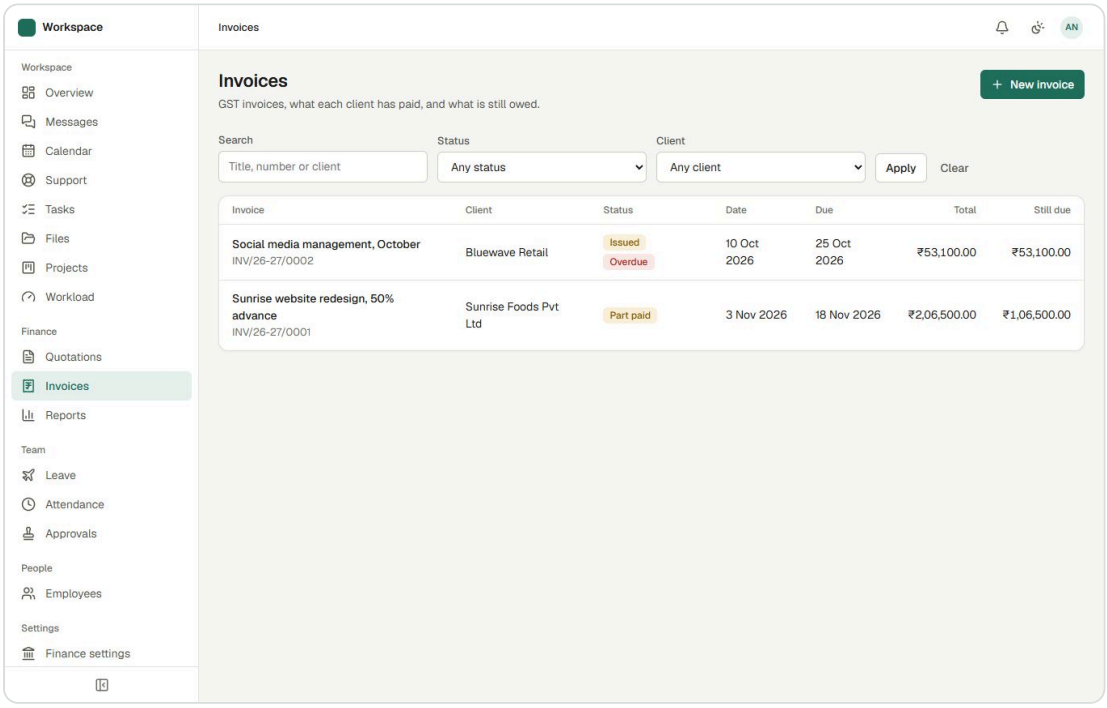

- **State** decides the tax: a client in the same state is charged **CGST + SGST**; a client in another state is charged **IGST**.
- **Invoice prefix** (at first INV) gives numbers like INV/26-27/0001. Numbering starts again every April. Set it before the first real invoice.
- Also set the usual GST rate (18%), payment terms (15 days) and how long quotations are valid (30 days).

Finance settings

Invoices

1. Click **New invoice**, or create one from an accepted quotation. Choose the client, add the items, and click **Save invoice as draft**. Leave the bill-to fields empty to use the client's details.
2. Check it, then click **Issue invoice**. It gets the next number and **can no longer be changed**.
3. Click **Print**, then **Print or save as PDF**, and send the PDF to the client.
4. If an issued invoice is wrong, click **Cancel invoice** with a reason, and issue a new one. A cancelled invoice keeps its number, as GST requires.

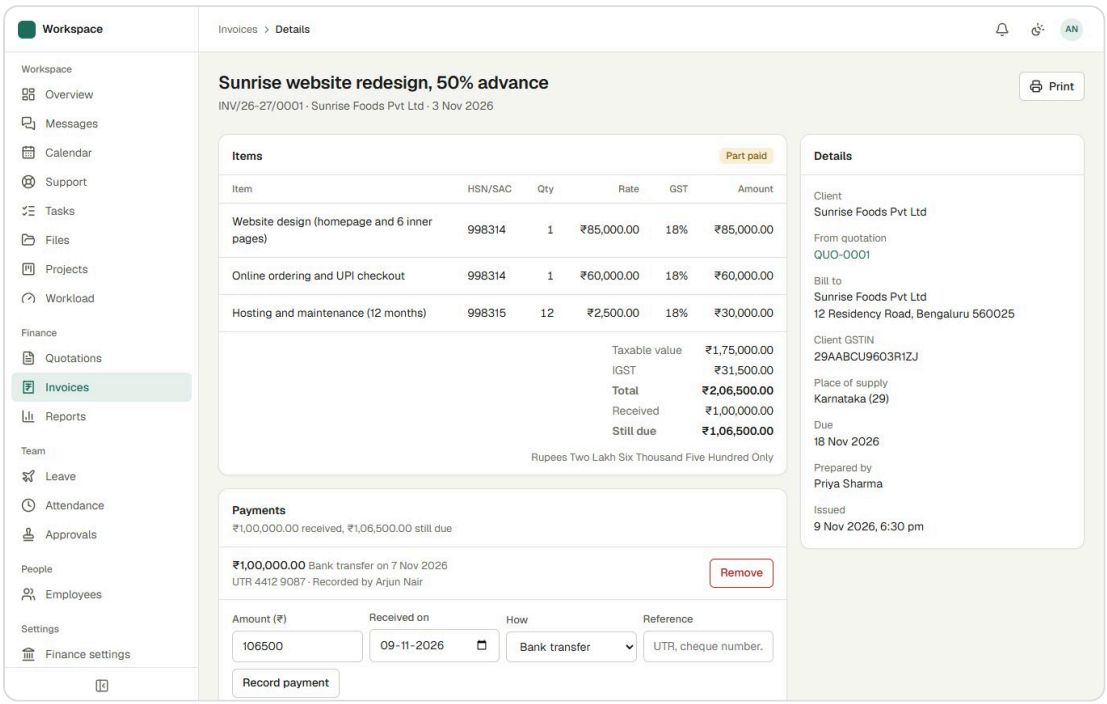

All invoices. Filter by status, such as Overdue or Not fully paid.

> A draft has no number, so deleting a draft leaves no gap. Invoice dates cannot be in the future.

Recording payments

1. Open the invoice. Under **Payments**, the amount starts at what is still due.
2. Enter the amount received, the date, how it was paid and the reference (UTR or cheque number). Click **Record payment**.
3. If the client deducted **TDS**, record that part as a payment with **TDS deducted by the client**.
4. The invoice moves to **Part paid**, then **Paid**, by itself. The Client Manager is told.

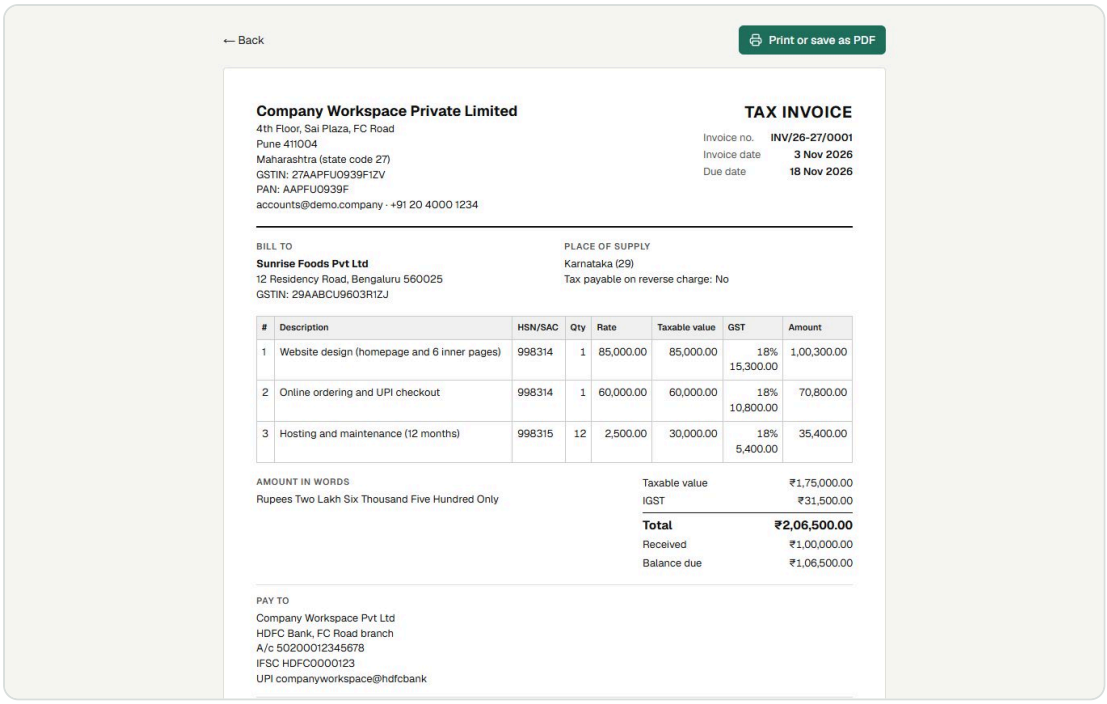

An invoice with a part payment

> A payment entered by mistake can be removed with **Remove**. To cancel an invoice, remove its payments first.

Printing and PDFs

The printed invoice has everything a GST tax invoice needs: both GSTINs, the place of supply, HSN/SAC codes, the tax split, the amount in words, your bank details and a signature line.

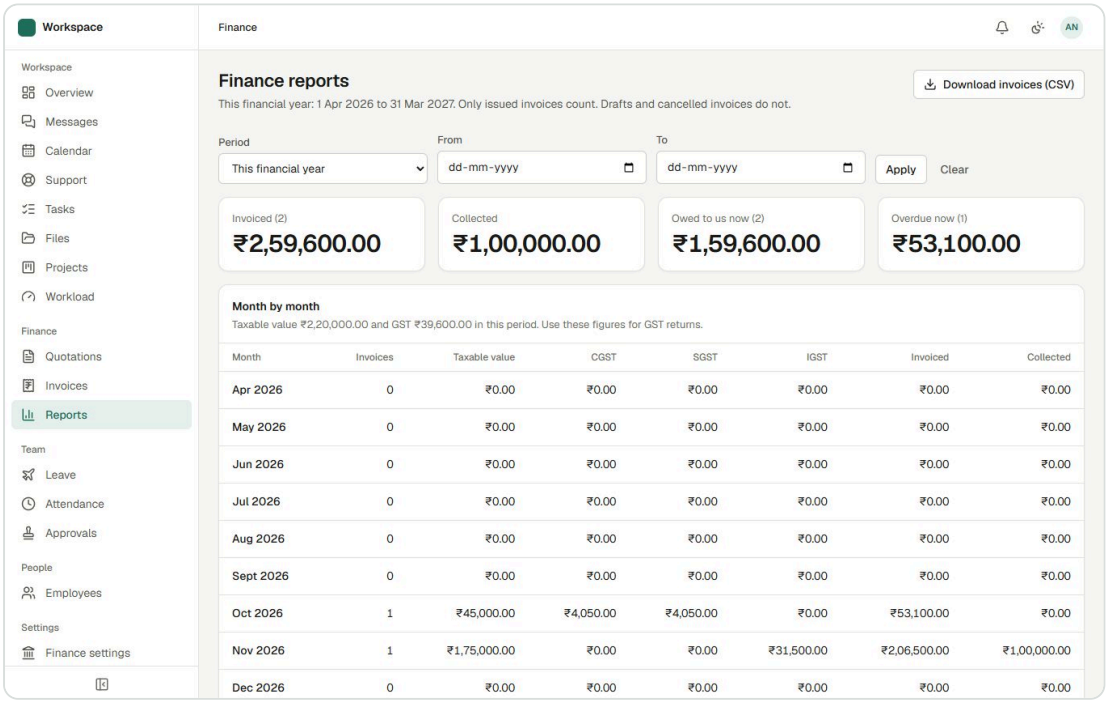

A printed tax invoice

Finance reports

Open **Reports** and choose a period (this month, quarter, financial year, or your own dates). You see:

- How much was **invoiced** and **collected**, what clients **owe now**, and what is **overdue**.
- **Month by month** taxable value, CGST, SGST and IGST, for GST returns.
- **Top clients** and **money owed by age** (not due yet, 1 to 30 days late, and so on).
- **Download invoices (CSV)** gives your accountant a spreadsheet of every invoice in the period.

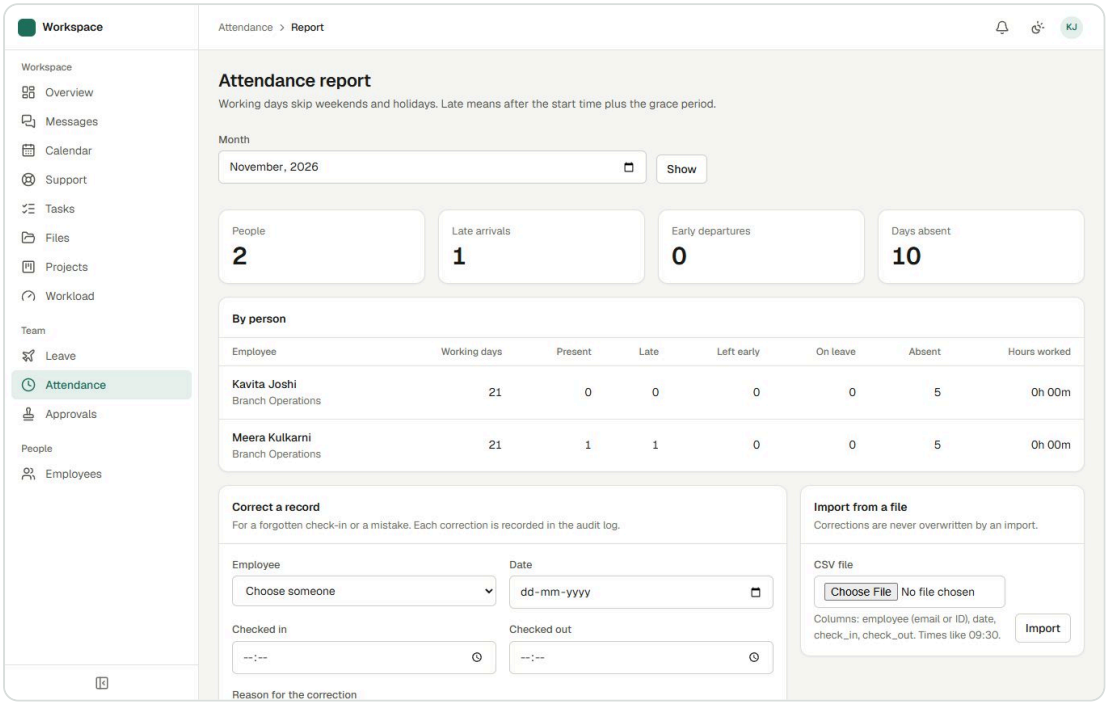

Finance reports

6. Branch Manager

You look after the branch team's people and day-to-day operations. Read chapter 3 too, for your team, giving out work and approving leave.

Attendance report

Open **Attendance**, then **Team report**. Choose a month and click **Show**. For each person you see working days, days present, late arrivals, early departures, leave, absences and hours worked.

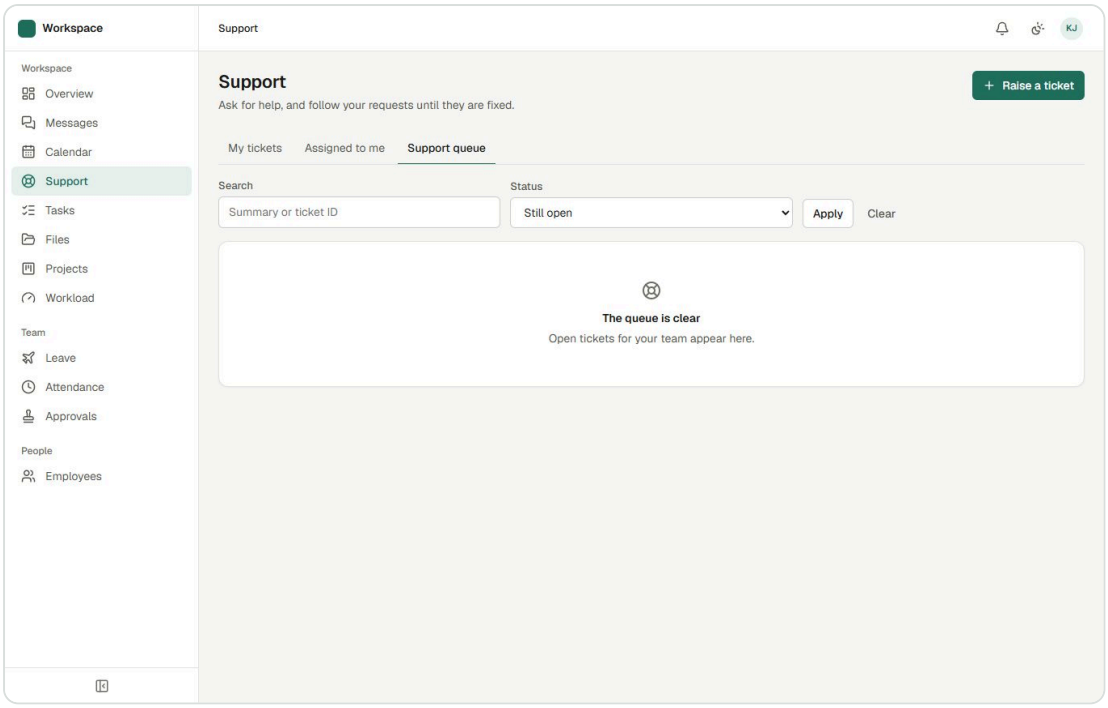

The attendance report, with correction and import

Correcting and importing attendance

- **Correct a record:** for a forgotten check-in or a mistake, choose the person and date, enter the times and a reason, and click **Save correction**. Each correction is recorded. You cannot correct your own attendance.
- **Import from a file:** choose a CSV file with the columns employee (email or ID), date, check_in and check_out, and click **Import**. Rows that cannot be used are listed. Manual corrections are never overwritten by an import.

Leave and tickets

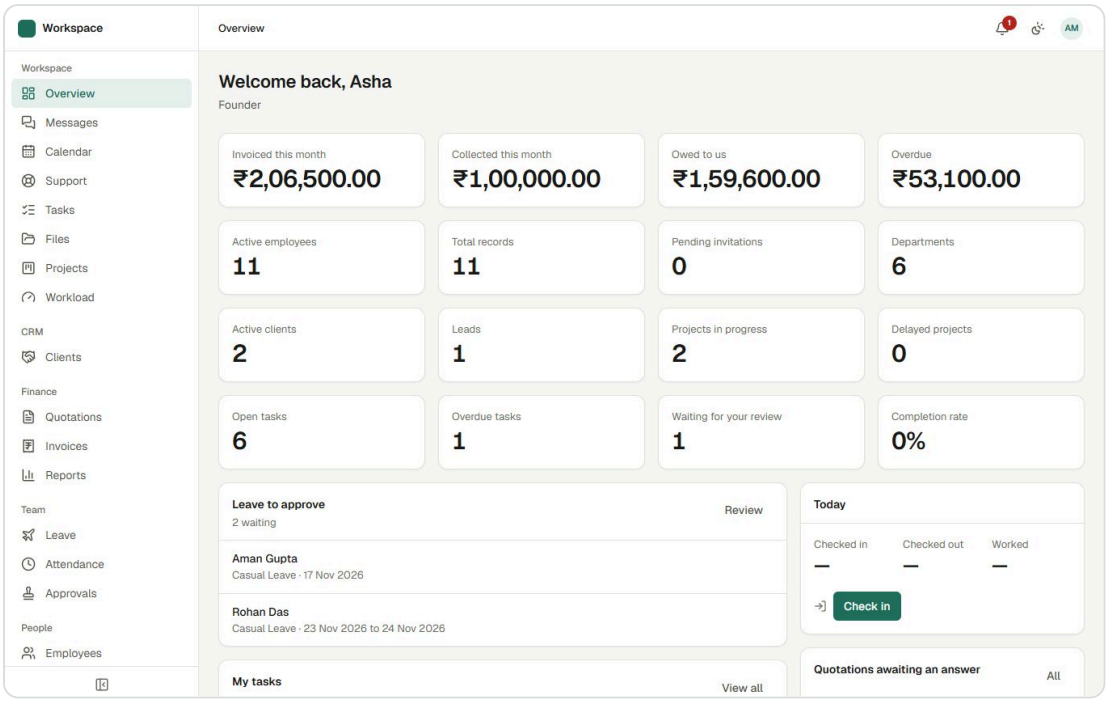

Approve your department's leave in **Approvals**, and handle your department's support tickets in **Support**, as described in chapter 3.

The Branch Manager's support queue

7. Administrators

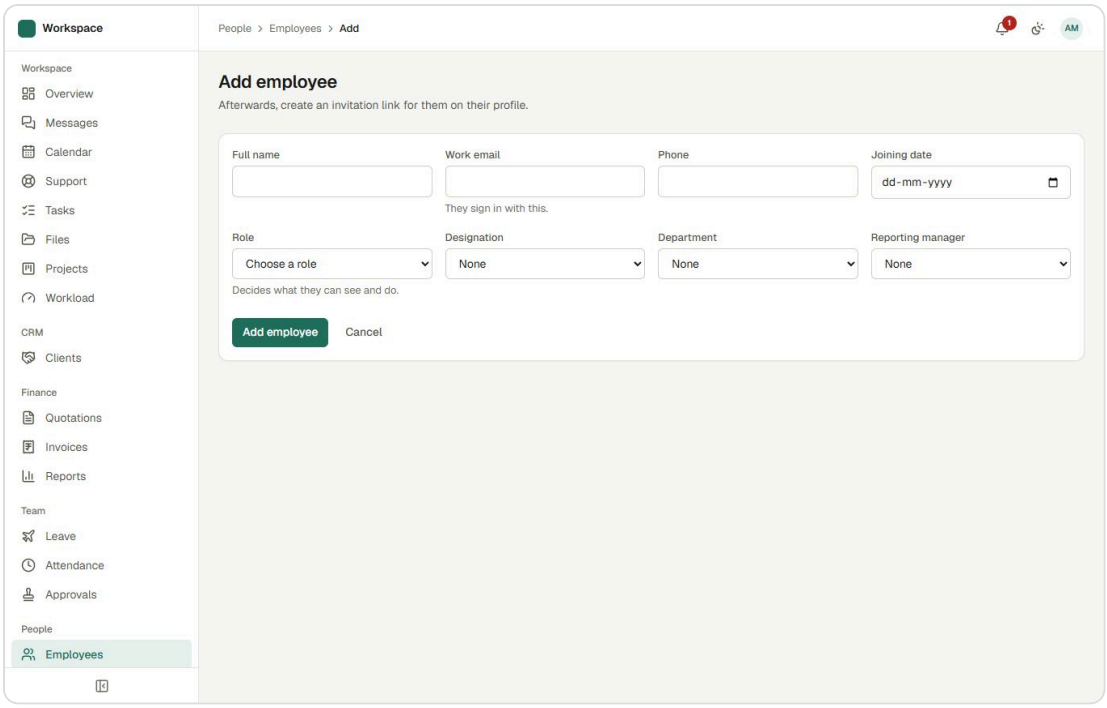

For the Founder and Co-Founder. You can see and change everything. Only the Founder can change roles and permissions.

The Founder's Overview, with revenue and organisation figures

Adding employees

1. Open **Employees** and click **Add employee**.
2. Enter the name and work email, and choose the **role** (what they can do), **designation** (their job title), **department** and **reporting manager**.
3. Click **Add employee**, then create their invitation link as below.

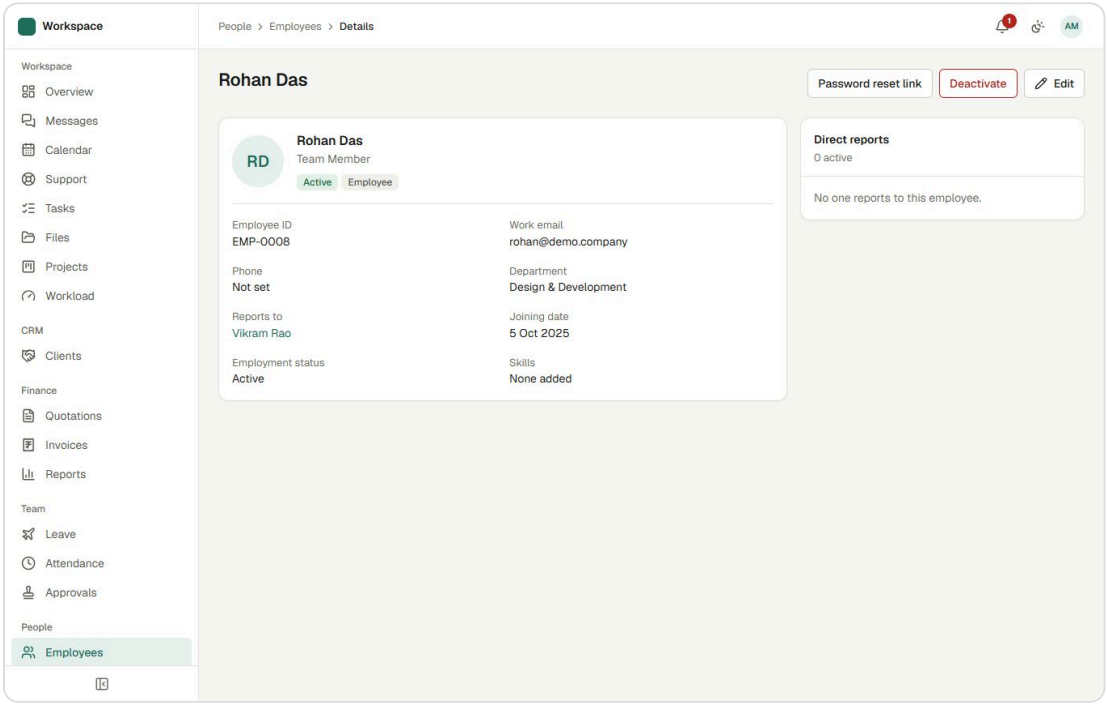

Adding an employee

Sign-in links

Email is not connected yet, so you create sign-in links and send them yourself. On the person's profile:

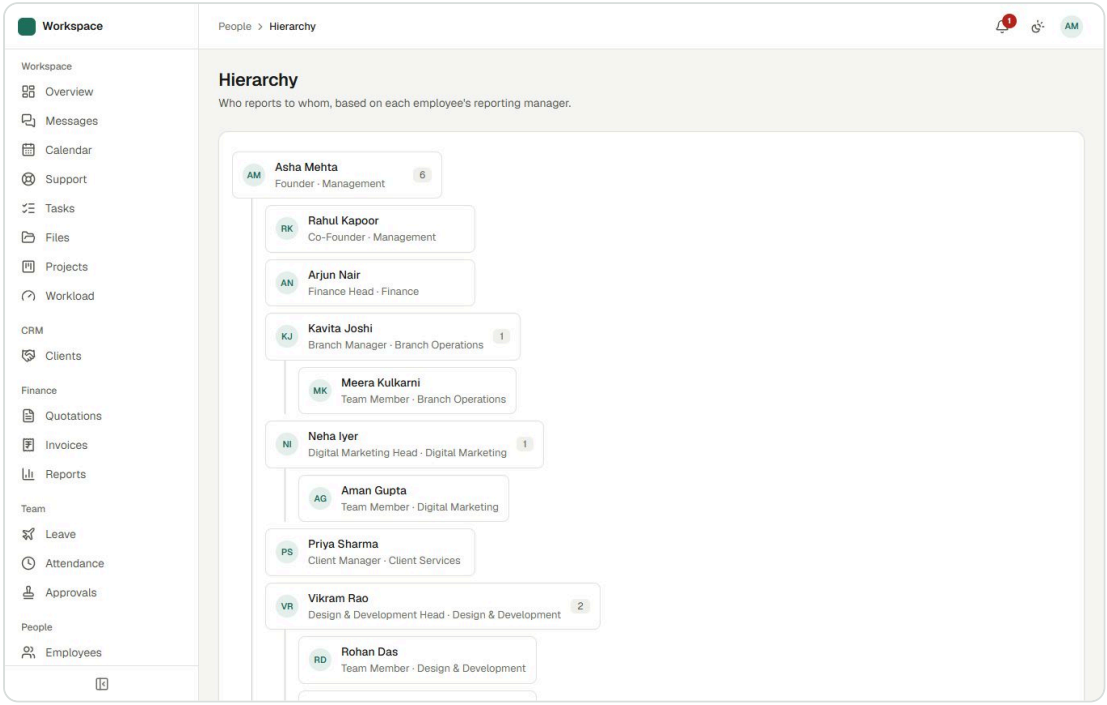

- **Invitation link** for someone who has not joined yet. It works once and lasts 7 days.
- **Password reset link** for someone who forgot their password. It works once and lasts 1 hour.
- Creating a new link stops the older one working.

An employee's profile, with the sign-in link and account buttons

Departments, designations and the org chart

- Departments: add departments and set each one's **department head**. Heads are needed for giving work to other departments and for routing support tickets.
- Designations: job titles and management levels. A designation gives no access; the role does.
- Hierarchy: the whole organisation chart, built from reporting managers.

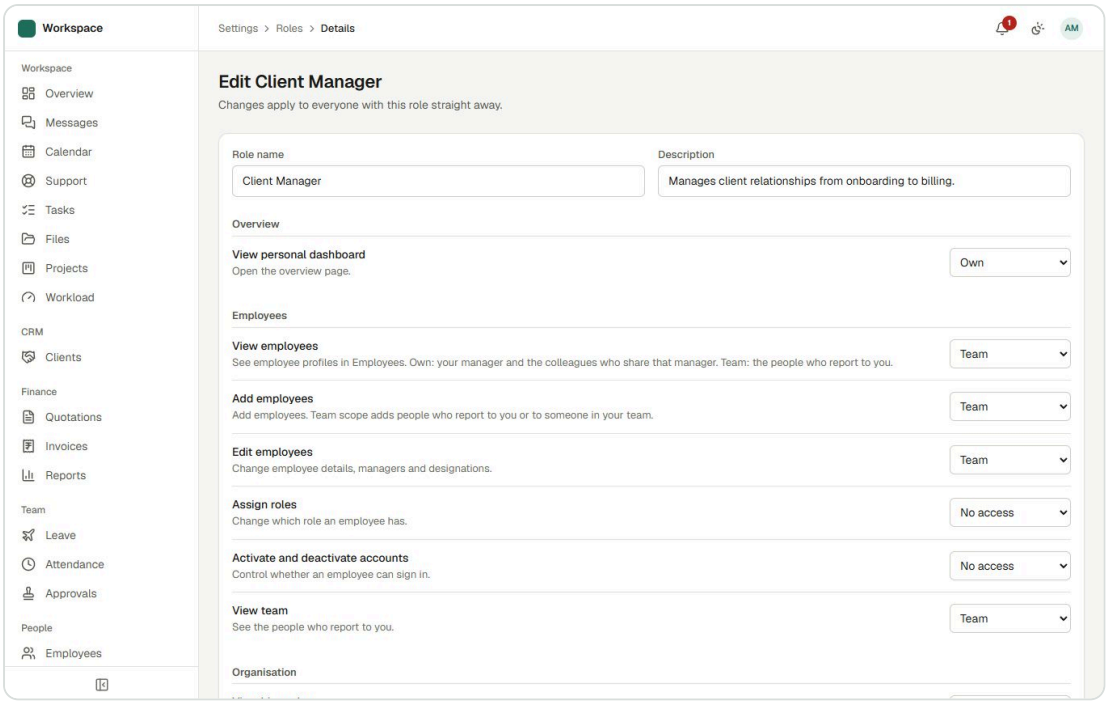

The organisation chart

Roles and permissions (Founder)

A role is a set of permissions. Each permission has a **reach**: own (themselves), team (people who report to them), department, or organisation (everyone). Menus and dashboards follow the permissions automatically, so a new role needs no other set-up.

1. Open Roles. Click a role to change it, or create a new one.
2. Tick the permissions and choose the reach for each, then click Save role.
3. Changes apply straight away to everyone with that role.

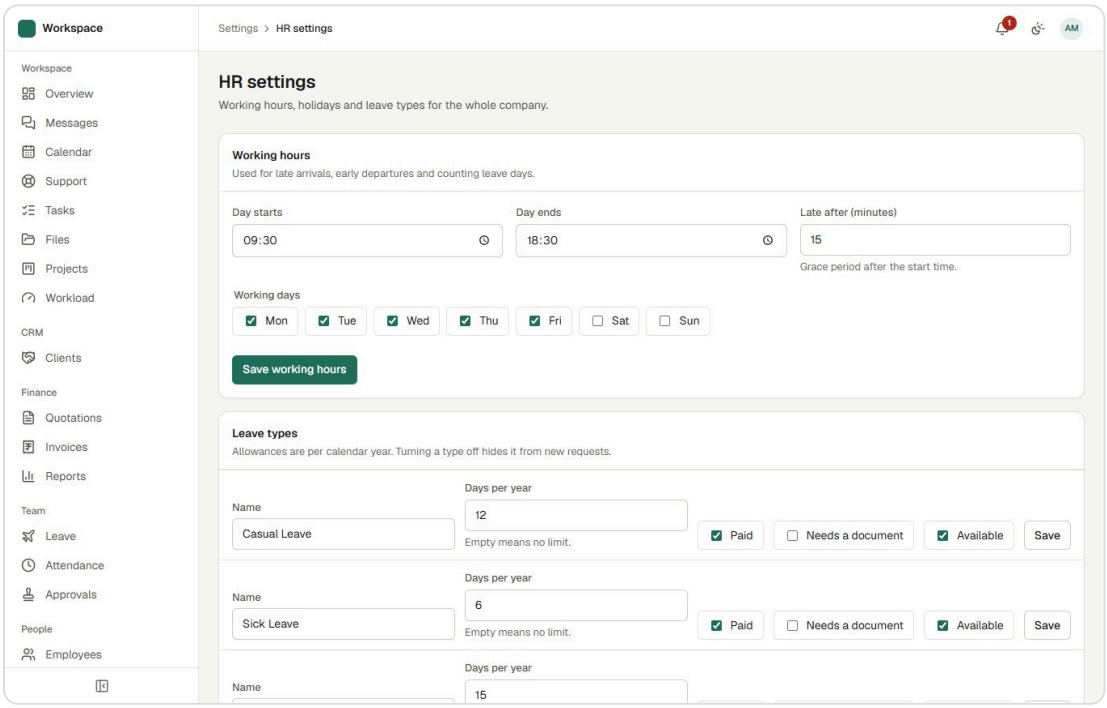

Editing the Client Manager role

> The Founder role cannot be edited. Nobody can give a role more access than they have themselves, and at least one active person must always be able to manage roles.

HR settings

Set the **working hours and days** and the grace period for late arrival, the **types of leave** and their yearly allowance, and the company **holidays**. Holidays are not counted as working days or leave.

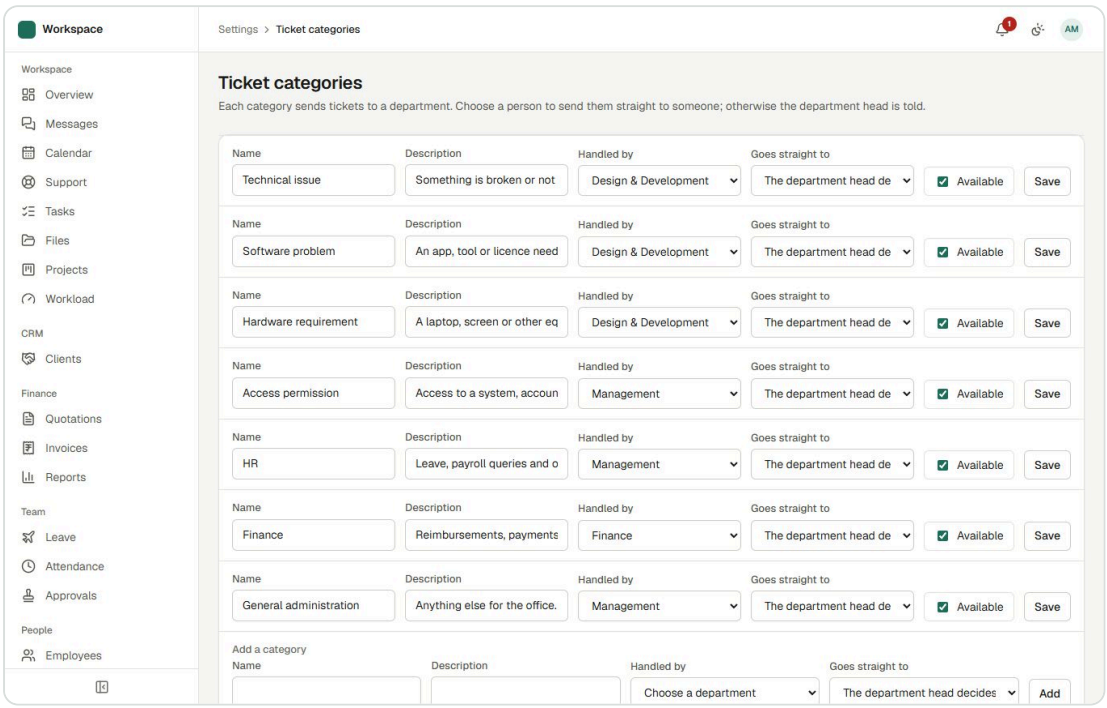

HR settings

Services and industries

Services & industries holds the lists people choose from when adding a client: the services, the sub services under each, and the industries. Rename an entry, move a sub service to another service, or add new ones. To stop an entry being chosen, untick **Can be chosen**; clients who already have it keep it.

Ticket categories

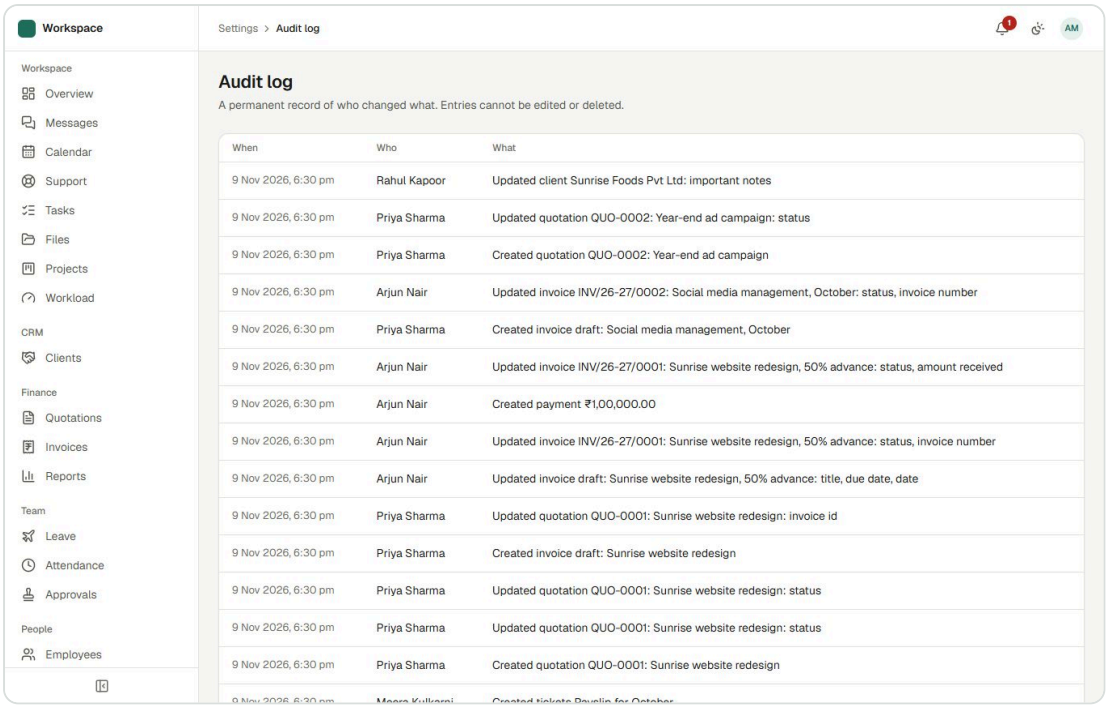

Each category has a department that handles it, and optionally a person it goes straight to. Otherwise the department head is notified and assigns it.

Ticket categories

Audit log

Audit log records who changed what and when, for every important record. Entries cannot be changed or deleted.

The audit log

Deactivating accounts

When someone leaves, open their profile and click **Deactivate**. They can no longer sign in, and their work and history stay. **Reactivate** brings the account back. Employees are never deleted.

8. How work flows from start to finish

Client to cash

Lead → Client → Project → Tasks → Quotation sent → Accepted → Invoice issued → Payment → Paid

Step	Who	Where
Add the lead, then make them a client	Client Manager	Clients
Start a project and give the work to the department head	Client Manager	Client 360, New project, New task
Share the work out and review it	Department head	Tasks, Projects
Do the work	Team members	Tasks
Quote, record the answer, create the invoice	Client Manager	Quotations
Issue and send the invoice	Client Manager or Finance Head	Invoices, Print
Record payments, follow up overdue invoices	Finance Head	Invoices, Reports

A task

Assigned → Accepted → In progress → Under review → Completed

- **Changes requested** sends it back to In progress. **On hold** pauses it. **Rejected** means the person could not take it on.
- **Overdue** is shown when the due date passes. After two days, the manager is told.
- A manager can **reopen** a completed task. Completing a repeating task creates the next one.

Leave

Request sent → Manager approves or rejects → Calendar and balance update

A support ticket

Raised → Assigned → In progress → Resolved → Closed

The handler can ask for more information, which waits for your reply. If the fix did not work, click **Still a problem** to reopen the ticket.

9. Questions and answers

I cannot see a page that a colleague can see.

Pages follow your role. If you need access, ask an administrator to change your role.

I forgot my password.

Ask an administrator for a password reset link. It lasts 1 hour.

My invitation link says it has expired.

Each link works once, and a newer link stops older ones. Ask for a new invitation link.

I am not getting phone alerts.

Turn them on in Notifications for each device, and allow notifications in your browser. On an iPhone, open the workspace from your home screen first.

I forgot to check in.

Ask your Branch Manager or an administrator to correct your attendance.

Why was my leave request refused?

It overlaps other leave, goes over your balance, or falls only on weekends and holidays. The message says which.

An issued invoice has a mistake.

Issued invoices cannot be changed. Cancel it with a reason and issue a new one. Remove any payments first.

A client paid less because of TDS.

Record the amount received, then record the deducted amount as a payment with **TDS deducted by the client**.

Someone has left the company.

An administrator deactivates their account. Their tasks and history stay; reassign their open tasks.

Who do I ask for help?

Raise a support ticket in the **General administration** or **Technical issue** category.
